Management Report

• Laporan Dewan Komisaris

Report of the Board of Commissioners

**Yusuf
Wibisono**

Komisaris Utama
President Commissioner

Para Pemegang Saham dan Pemangku Kepentingan yang Terhormat, Dear Esteemed Shareholders and Stakeholders,

Puji dan syukur kami panjatkan ke hadirat Tuhan Yang Maha Esa atas segala rahmat dan karunia-Nya, sehingga PT Dayamitra Telekomunikasi Tbk ("Mitratel") dapat melalui tahun 2024 dengan pencapaian yang membanggakan. Sepanjang tahun, kami melihat Mitratel terus menunjukkan ketahanan yang solid dalam menghadapi dinamika ekonomi dan industri, didukung oleh kinerja keuangan dan pertumbuhan profitabilitas yang positif, serta posisi keuangan yang semakin kuat, yang mencerminkan efektivitas strategi bisnis yang diterapkan. Selain itu, keunggulan operasional serta inovasi yang dilakukan telah memberikan nilai tambah sehingga memperkuat fundamental dan daya saing Mitratel di tengah dinamika industri.

Sepanjang tahun, kami terus melakukan pengawasan dan pemberian nasihat kepada Direksi untuk memastikan kebijakan yang diambil selaras dengan visi jangka panjang dan prinsip Tata Kelola Perusahaan yang Baik (*Good Corporate Governance/GCG*). Adapun hasil pengawasan Dewan Komisaris terhadap operasional Mitratel di sepanjang tahun 2024 dapat kami sampaikan sebagai berikut.

Situasi Ekonomi dan Industri

Perekonomian tahun 2024 menghadapi berbagai tantangan yang dipengaruhi oleh ketidakpastian geopolitik global, inflasi yang masih tinggi di beberapa negara, serta kebijakan moneter yang ketat di banyak wilayah. Meskipun demikian, ekonomi domestik menunjukkan ketahanan yang baik dengan tumbuh 5,03%, didorong oleh konsumsi masyarakat yang kuat, stabilitas sektor keuangan, serta berbagai kebijakan pemerintah yang mendukung pertumbuhan investasi dan industri.

Dalam perkembangan industri, tren digitalisasi dan peningkatan adopsi teknologi terus menjadi pendorong utama pertumbuhan. Mitratel melihat peluang yang cukup besar dalam mendukung peningkatan kebutuhan akan layanan digital seiring dengan perubahan perilaku konsumen dan akselerasi transformasi digital di berbagai sektor. Namun, tantangan tetap ada, termasuk persaingan yang semakin ketat yang didorong perubahan lanskap industri seluler dan strategi para operator seluler (*mobile network operator/MNO*) yang mengharuskan Mitratel untuk tetap adaptif dan inovatif.

Kami menilai bahwa Mitratel mampu menavigasi tantangan ini dengan baik melalui strategi yang terarah, peningkatan efisiensi operasional, serta inovasi yang berkelanjutan. Dengan pendekatan yang proaktif dalam mengantisipasi

We would like to extend our highest praise and gratitude to God Almighty for His blessings and grace, enabling PT Dayamitra Telekomunikasi Tbk ("Mitratel") to navigate the year 2024 with remarkable achievements. Throughout the year, we witnessed Mitratel demonstrating solid resilience in facing economic and industry dynamics, supported by positive financial performance, profitability growth, and a strengthened financial position, reflecting effectiveness of the business strategies implemented. Additionally, operational excellence and continuous innovation have added significant value, further reinforcing Mitratel's fundamentals and competitiveness amid industry dynamics.

Throughout the year, we continuously provided oversight and advisory support to the Board of Directors to ensure that the decisions made align with the Company's long-term vision and the principles of Good Corporate Governance (GCG). The results of the Board of Commissioners' oversight of Mitratel's operations throughout 2024 are as follows.

Economic and Industry Situation

The economy in 2024 faced various challenges influenced by global geopolitical uncertainties, persistently high inflation in several countries, and tight monetary policies in many regions. Despite these external pressures, the domestic economy demonstrated strong resilience, growing by 5.03%, driven by robust consumer spending, financial sector stability, and government policies that supported investment growth and industrial development.

In terms of industry trends, digitalization and the increasing adoption of technology have remained key drivers of growth. Mitratel sees significant opportunities in supporting the rising demand for digital services, fueled by shifting consumer behavior and the acceleration of digital transformation across various sectors. However, challenges persist, including intensifying competition driven by changes in the mobile industry landscape and the evolving strategies of mobile network operators (MNOs), requiring Mitratel to remain adaptive and innovative.

We believe that Mitratel has successfully navigated these challenges through well-directed strategies, operational efficiency improvements, and continuous innovation. With a proactive approach in anticipating market changes and

perubahan pasar dan memperkuat daya saing, kami optimis Mitratel dapat terus tumbuh dan memberikan nilai tambah bagi Pemegang Saham serta seluruh pemangku kepentingan.

Pengawasan dan Penilaian atas Kinerja Direksi

Di tengah dinamika makroekonomi serta industri yang berkembang, kami menilai bahwa Direksi telah menunjukkan kinerja yang solid sepanjang tahun 2024 sejalan dengan strategi bisnis dan target pertumbuhan yang telah ditetapkan. Pencapaian ini semakin kuat dengan adanya ekspansi tenant baru baik melalui *Built to Suit* (B2S) maupun *co-location*. Kami memandang Mitratel mampu menyeimbangkan penambahan tower baru melalui B2S dengan *co-location* sesuai kebutuhan para MNO dalam menjalankan strategi bisnisnya. Pendekatan ini memberikan hasil yang positif bagi pertumbuhan bisnis, dan kami melihat bahwa strategi ini berada dalam jalur yang tepat dan mendukung pertumbuhan jangka panjang.

Kami terus mendorong peningkatan efisiensi operasional, terutama dalam hal *operation* dan *maintenance* menara serta pengelolaan sewa lahan yang merupakan komponen biaya terbesar. Upaya yang dilakukan telah menunjukkan hasil positif, membuka peluang bagi efisiensi yang berkelanjutan dalam beberapa tahun mendatang.

Selain dari bisnis organik, kami mendorong Direksi untuk terus mengidentifikasi peluang-peluang inorganik yang sesuai dengan strategi Mitratel dan berpotensi memberikan kontribusi positif bagi pertumbuhan Mitratel, baik dalam jangka pendek, menengah, hingga panjang. Langkah ini merupakan bagian dari strategi untuk memperkuat fundamental bisnis serta meningkatkan kepemimpinan dan daya saing Mitratel di masa mendatang. Dengan berbagai upaya yang telah dilakukan, kami memberikan apresiasi atas kinerja Direksi dan mendorong kelanjutan strategi yang proaktif serta inovatif untuk mendukung pertumbuhan berkelanjutan Mitratel.

Frekuensi dan Cara Pemberian Nasihat kepada Direksi

Kami secara aktif menjalankan fungsi pengawasan dan pemberian nasihat kepada Direksi melalui berbagai mekanisme komunikasi dan koordinasi yang terstruktur. Interaksi antara Dewan Komisaris dan Direksi dilakukan secara berkala melalui rapat Dewan Komisaris, rapat gabungan dengan Direksi, serta komunikasi informal untuk memastikan keselarasan dalam pengambilan keputusan strategis dan operasional.

strengthening competitiveness, we are confident that Mitratel will continue to grow and deliver added value to Shareholders and all stakeholders.

Supervision and Assessment of the Board of Directors' Performance

In the midst of evolving macroeconomic and industry dynamics, we assess that the Board of Directors demonstrated solid performance throughout 2024, in line with the established business strategy and growth targets. This achievement has been further strengthened by the expansion of new tenants through both *Built to Suit* (B2S) and *co-location*. We believe that Mitratel has successfully balanced the addition of new towers via B2S with *co-location* to align with the business strategies of MNOs. This approach has yielded positive results for business growth, and we see that this strategy is on the right track, supporting long-term expansion.

We continue to encourage improvements in operational efficiency, particularly in tower operation and maintenance, as well as land lease management, which represent the largest cost components. The initiatives undertaken have already delivered positive results, opening opportunities for sustainable efficiency in the coming years.

In addition to organic business growth, we encourage the Board of Directors to continuously identify inorganic opportunities that align with Mitratel's strategy and have the potential to contribute positively to its growth in the short, medium, and long term. This initiative is part of the broader strategy to strengthen the Company's business fundamentals while enhancing its leadership and competitiveness in the future. With the various efforts that have been undertaken, we express our appreciation for the Board of Directors' performance and support the continuation of a proactive and innovative strategy to drive Mitratel's sustainable growth.

Frequency and Method of Providing Advice to the Board of Directors

We actively carry out the supervisory and advisory functions to the Board of Directors through various structured communication and coordination mechanisms. The interaction between the Board of Commissioners and the Board of Directors is conducted regularly through Board of Commissioners meetings, joint meetings with the Board of Directors, as well as informal communication to ensure alignment in strategic and operational decision-making.

Setiap anggota Direksi dinilai telah menjalankan perannya dengan efektif di bidang masing-masing. Direktur Utama secara keseluruhan kami pandang telah cukup efektif dalam mengendalikan Mitratel dengan semangat dan determinasi yang tinggi untuk mendorong pertumbuhan bisnis. Direktur Bisnis memiliki peran kunci dalam memastikan ekspansi bisnis melalui pertumbuhan *tenant* dan pengembangan lini bisnis fiber yang prospektif. Direktur Operasi dan Pembangunan kami nilai telah berhasil dalam menjaga *operational excellence* dan mengoptimalkan efisiensi biaya termasuk dalam mengelola biaya sewa lahan.

Di sisi pengelolaan keuangan dan risiko, Direktur Keuangan dan Manajemen Risiko berhasil menjaga stabilitas keuangan dan mendemonstrasikan pengelolaan risiko yang baik. Sementara itu, Direktur Investasi telah berperan penting dalam membuka peluang pertumbuhan jangka panjang melalui kegiatan inorganik, pengelolaan pendanaan dan membangun *engagement* dengan investor sehingga Mitratel mendapatkan persepsi positif.

Kami memberikan arahan strategis yang disesuaikan dengan kondisi industri dan dinamika bisnis yang dihadapi Mitratel. Dengan pendekatan kolaboratif, kami memastikan bahwa seluruh inisiatif dan strategi yang dijalankan Direksi tidak hanya mendukung pertumbuhan jangka pendek, tetapi juga memperkuat fundamental bisnis untuk mencapai keberlanjutan jangka panjang.

Pandangan atas Penerapan Tata Kelola Perusahaan yang Baik

Kami menilai bahwa penerapan GCG di Mitratel telah berjalan secara konsisten, berlandaskan prinsip perilaku beretika, akuntabilitas, transparansi, serta keberlanjutan. Implementasi GCG yang kuat menjadi landasan utama dalam memastikan efektivitas manajemen, pengambilan keputusan yang sesuai dengan kepentingan Pemegang Saham, serta perlindungan terhadap hak seluruh pemangku kepentingan. Untuk mendukung hal ini, kami melihat Mitratel secara berkesinambungan terus memperkuat sistem pengawasan dan pengendalian internal, meningkatkan transparansi dalam pelaporan keuangan, serta memastikan kepatuhan terhadap regulasi yang berlaku. Selain itu, langkah-langkah proaktif dalam manajemen risiko juga terus dikembangkan guna mengantisipasi berbagai tantangan bisnis, baik dari sisi operasional, keuangan, maupun kepatuhan terhadap kebijakan industri yang dinamis.

President Director

Para Pemegang Saham, Dewan Komisaris, dan Para Pemangku Kepentingan yang Terhormat, Distinguished Shareholders, Board of Commissioners, and Stakeholders,

Puji dan syukur kami panjatkan ke hadirat Tuhan Yang Maha Esa atas pencapaian yang telah diraih PT Dayamitra Telekomunikasi Tbk ("Mitratel") sepanjang tahun 2024. Tahun ini menjadi periode yang penuh tantangan sekaligus peluang bagi Mitratel dalam menjaga pertumbuhan dan daya saing di tengah dinamika ekonomi global maupun domestik. Namun, dengan strategi yang terarah dan komitmen terhadap inovasi, Mitratel terus memperkuat fundamental bisnis untuk mencapai pertumbuhan yang berkelanjutan.

Sejalan dengan tema "*Expanding Digital Connectivity Across Frontiers*", Mitratel berkomitmen untuk memperluas akses dan jangkauan infrastruktur dalam mendukung konektivitas digital guna mendorong transformasi industri, mendukung pertumbuhan ekonomi, serta meningkatkan inklusi digital bagi masyarakat luas. Dengan mempercepat pembangunan infrastruktur dan optimalisasi teknologi, Mitratel tidak hanya memperkuat posisi sebagai pemimpin di industri, tetapi juga berkontribusi dalam membangun ekosistem digital yang lebih inklusif dan efisien. Mitratel percaya bahwa dengan konektivitas yang lebih luas dan andal, peluang ekonomi dapat tumbuh lebih cepat, mendukung inovasi di berbagai sektor, serta menciptakan dampak ekonomi dan sosial yang lebih besar di seluruh wilayah operasi. Perjalanan Mitratel dalam mewujudkan komitmen tersebut secara ringkas kami sampaikan sebagai berikut.

Situasi Ekonomi dan Industri

Tahun 2024 merupakan periode yang penuh tantangan bagi perekonomian global dan nasional. Berbagai faktor eksternal mempengaruhi stabilitas ekonomi dunia, termasuk meningkatnya harga energi akibat konflik geopolitik serta lonjakan permintaan pasca pandemi yang menyebabkan tekanan inflasi di berbagai negara. Volatilitas pasar keuangan dan kebijakan moneter yang lebih ketat di banyak negara turut memperlambat laju investasi serta mempengaruhi daya beli masyarakat. Kondisi ini berdampak pada arus modal global, nilai tukar, serta stabilitas sektor industri di berbagai negara, termasuk Indonesia.

Meskipun menghadapi tantangan tersebut, ekonomi Indonesia tetap menunjukkan ketahanan yang cukup baik dengan tumbuh 5,03%, didorong oleh konsumsi domestik yang kuat, serta didukung oleh stabilitas sektor keuangan dan kebijakan fiskal dan moneter yang adaptif. Di sisi lain, industri digital dan telekomunikasi menjadi salah satu sektor yang terus bertumbuh seiring perubahan cara berkomunikasi melalui berbagai platform media sosial

We extend our gratitude to God Almighty for the achievements attained by PT Dayamitra Telekomunikasi Tbk ("Mitratel") throughout 2024. This year has been a period filled with both challenges and opportunities for Mitratel in maintaining growth and competitiveness amid the global and domestic economic dynamics. However, with a well-directed strategy and a strong commitment to innovation, Mitratel continues to strengthen its business fundamentals to achieve sustainable growth.

In line with the theme "*Expanding Digital Connectivity Across Frontiers*", Mitratel is committed to expanding infrastructure access and coverage to support digital connectivity, drive industry transformation, foster economic growth, and enhance digital inclusion for broader society. By accelerating infrastructure development and optimizing technology, Mitratel not only strengthens its position as an industry leader, but also contributes to building a more inclusive and efficient digital ecosystem. Mitratel believes that with broader and more reliable connectivity, economic opportunities can grow faster, supporting innovation across various sectors, and creating greater economic and social impact throughout its operational areas. The following is a summary of Mitratel's journey in realizing this commitment.

Economic and Industry Situation

The year 2024 was a challenging period for both the global and national economies. Various external factors affected global economic stability, including rising energy prices due to geopolitical conflicts and a surge in post-pandemic demand, which led to inflationary pressures in many countries. Financial market volatility and tighter monetary policies in several nations further slowed investment flows and impacted consumer purchasing power. These conditions influenced global capital flows, exchange rates, and the stability of industrial sectors across different countries, including Indonesia.

Despite these challenges, the Indonesian economy continues to show good resilience by growing 5.03%, driven by robust domestic consumption and supported by the stability of the financial sector as well as adaptive fiscal and monetary policies. On the other hand, the digital and telecommunications industry continued to expand as communication methods evolved through various social media platforms and the increasing adoption of internet-

maupun meningkatnya adopsi teknologi berbasis internet, seperti *e-commerce*, *fintech*, dan *games*, sehingga pada tahun 2024, sektor telekomunikasi mampu tumbuh cukup baik sebesar 7,57%.

Seiring dengan pertumbuhan industri telekomunikasi, permintaan terhadap layanan infrastruktur pendukung telekomunikasi mengalami peningkatan, didorong kebutuhan akan konektivitas yang lebih berkualitas dan berkapasitas tinggi, menjangkau wilayah yang luas, dan efisien. Namun, tantangan tetap ada, terutama dalam menghadapi dinamika industri di sektor seluler, yang ditandai dengan kecenderungan operator seluler (*mobile network operator*/MNO) untuk semakin efisien dalam belanja modal serta kompetisi di antara operator seluler itu sendiri. Oleh karena itu, strategi yang adaptif dan inovatif sangat diperlukan untuk memastikan keberlanjutan bisnis. Penguatan keunggulan kompetitif melalui inovasi teknologi sesuai kebutuhan pelanggan, efisiensi operasional, serta pengelolaan risiko yang optimal menjadi faktor utama bagi Mitratel dalam menjaga daya saing dan pertumbuhan yang berkelanjutan.

Tantangan dan Strategi Mitratel 2024

Di tengah dinamika makroekonomi dan industri yang berkembang, Mitratel menghadapi situasi yang semakin menantang, termasuk lingkungan suku bunga tinggi, MNO yang semakin efisien dalam membelanjakan modal, dan meningkatnya persaingan industri. Berbagai dinamika tersebut mendorong Mitratel untuk terus berinovasi dalam memberikan layanan yang unggul sesuai kebutuhan MNO dengan didukung instrumen keuangan yang efisien, dan disaat yang sama berupaya meningkatkan efisiensi di seluruh lini operasional. Mitratel juga melihat berlanjutnya tren MNO untuk melakukan strategi divestasi aset non inti yang sekaligus dapat menjadi peluang bagi Mitratel. Selain itu, potensi terjadinya konsolidasi MNO masih terbuka, sehingga Mitratel tetap adaptif dan responsif terhadap dinamika industri.

Mitratel juga terlibat aktif dalam perkembangan teknologi terkini termasuk di area *Non-Terrestrial Network* (NTN) yang dapat menjadi pendorong transformasi industri telekomunikasi terutama di wilayah rural. Dengan semakin berkembangnya ekosistem digital, kebutuhan akan infrastruktur telekomunikasi yang lebih canggih dan efisien semakin meningkat, sehingga Mitratel perlu memastikan bahwa layanan yang ditawarkan tetap relevan dengan kebutuhan operator telekomunikasi dan pelanggan.

Untuk merespons berbagai tantangan tersebut, Mitratel menerapkan *dual-pronged strategy*, yaitu melalui ekspansi organik dan inorganik, guna mengembangkan ekosistem menara telekomunikasi secara terintegrasi sesuai dengan kebutuhan operator telekomunikasi. Ekosistem utama dalam industri menara mencakup pembangunan menara

based technologies such as *e-commerce*, *fintech*, and *games*, and thus, in 2024, the telecommunications sector recorded solid growth of 7.57%.

Along with the telecommunications industry growth, the demand for telecommunications infrastructure services has increased, driven by the need for higher-quality, high-capacity connectivity that is expansive and efficient. However, challenges remain, particularly in navigating the dynamics of the mobile sector, where mobile network operators (MNOs) are increasingly focused on capital expenditure efficiency amid intensifying competition. Therefore, an adaptive and innovative strategy is essential to ensure business sustainability. Strengthening competitive advantages through customer-driven technological innovation, operational efficiency, and optimal risk management are key factors for Mitratel in maintaining competitiveness and achieving sustainable growth.

Mitratel's Challenges and Strategies in 2024

Amid the evolving macroeconomic and industry dynamics, Mitratel faces an increasingly challenging landscape, including a high-interest rate environment, MNOs becoming more efficient in capital expenditures, and intensifying industry competition. These dynamics drive Mitratel to continuously innovate in delivering superior services tailored to MNO needs, supported by efficient financial instruments while simultaneously enhancing efficiency across all operational lines. Mitratel also recognizes the ongoing trend of MNOs divesting non-core assets, which presents potential opportunities for the company. Additionally, the possibility of MNO consolidation remains open, requiring Mitratel to stay adaptive and responsive to industry dynamic.

Mitratel is also actively engaged in the latest technological advancements, including in the *Non-Terrestrial Network* (NTN) domain, which has the potential to drive the transformation of the telecommunications industry, particularly in rural areas. As the digital ecosystem continues to evolve, the demand for more advanced and efficient telecommunications infrastructure is increasing. Therefore, Mitratel must ensure that its services remain relevant to the needs of telecom operators and customers.

To address these challenges, Mitratel implements a dual-pronged strategy through both organic and inorganic expansion to develop an integrated telecommunications tower ecosystem tailored to the needs of telecom operators. The core ecosystem in the tower industry includes the construction of telecommunications towers,

telekomunikasi, jaringan fiber optik, serta layanan *Power as a Service* (PaaS) guna mendukung layanan seluler yang berkualitas, termasuk mendukung implementasi teknologi 5G. Dengan mengoptimalkan ekspansi organik, Mitratel berfokus pada peningkatan tingkat profitabilitas dan efisiensi operasional, sedangkan melalui ekspansi inorganik, Mitratel aktif mencari peluang strategis untuk akuisisi aset yang dapat mempercepat pertumbuhan skala bisnis.

Diversifikasi bisnis yang dilakukan diharapkan dapat memperkuat posisi Mitratel sebagai penyedia infrastruktur telekomunikasi terdepan, meningkatkan pendapatan serta profitabilitas, dan memastikan pertumbuhan jangka panjang yang berkelanjutan. Dengan strategi yang komprehensif ini, Mitratel optimis dapat menghadapi tantangan industri dengan lebih adaptif dan inovatif, sekaligus mempertahankan daya saing yang kuat di era digital yang semakin berkembang.

ANALISIS DAN PEMBAHASAN MANAJEMEN

Management Discussion and Analysis

● Tinjauan Ekonomi Economic Overview

Disepanjang tahun 2024, situasi geopolitik global masih diwarnai oleh berlanjutnya konflik antara Rusia dan Ukraina serta konflik di wilayah Timur Tengah, antara Israel ke Palestina yang pada gilirannya memengaruhi kondisi perekonomian global, terutama karena meningkatnya harga energi. Sementara di Amerika Serikat, terpilihnya kembali Presiden Donald Trump memberi nuansa tersendiri akibat kebijakan *America First* yang juga dapat membawa pengaruh besar terhadap lanskap perekonomian global.

Dinamika geopolitik yang cepat telah berdampak pada perkembangan ekonomi dan pola pertumbuhan antarnegara, seiring dengan meningkatnya fragmentasi ekonomi dan perdagangan dunia. Ekonomi Amerika Serikat pada tahun 2024 tumbuh 2,8%, sedikit lebih rendah dari tahun sebelumnya 2,9% dan di saat yang sama menghadapi risiko meningkatnya inflasi apabila kebijakan tarif impor terhadap negara mitra dagangnya diberlakukan. Sementara itu, pertumbuhan ekonomi Tiongkok tercatat sebesar 5,0% pada tahun 2024, yang didorong oleh ekspor yang kuat dan didukung oleh berbagai stimulus pemerintah, sedangkan kawasan Uni Eropa mengalami pertumbuhan ekonomi yang cenderung melambat, yaitu sebesar 1,0% pada tahun 2024 terutama akibat melemahnya ekspor dan turunnya permintaan domestik.

Secara keseluruhan, pertumbuhan ekonomi global pada tahun 2024 diproyeksikan berada pada kisaran 2,6% hingga 3,2%, berdasarkan proyeksi lembaga internasional, di mana Bank Dunia memperkirakan pertumbuhan ekonomi dunia tumbuh sebesar 2,6%, sedangkan IMF memproyeksikan sebesar 3,2%.

Di tengah situasi tersebut, ekonomi Indonesia tumbuh cukup baik sebesar 5,03%, pada tahun 2024, dengan tingkat inflasi yang terkendali sebesar 1,57%, yang didukung oleh konsumsi domestik yang tetap kuat.

- Badan Pusat Statistik – Berita Resmi Statistik: Pertumbuhan Ekonomi Indonesia Triwulan IV-2024.

In 2024, the global geopolitical landscape remained influenced by the ongoing conflict between Russia and Ukraine, as well as the tensions in the Middle East between Israel and Palestine, which continued to impact global economic conditions, particularly due to the rising energy prices. Additionally, the re-election of President Donald Trump in the United States introduced new dynamics with the “America First” policy; thus, potentially exerting major impact on the global economic landscape.

The rapidly evolving geopolitical dynamics significantly affected economic development and growth patterns across nations, causing increased fragmentation of the global economy and trade. In 2024, the United States economy grew by 2.8%, slightly below the previous year's 2.9%, while also facing the risk of increasing inflation should import tariff policies targeting its trade partners be implemented. In contrast, China's economy grew by 5.0% in 2024, driven by strong exports and supported by various government stimulus measures. Meanwhile, the European Union experienced a slowdown in economic growth, at a rate of 1.0% in 2024, primarily due to weakening exports and falling domestic demand.

Overall, global economic growth in 2024 was projected to be in the range of 2.6% to 3.2%, based on projections from international institutions, where the World Bank estimated world economic growth to grow by 2.6%, while the IMF projected the growth at 3.2%.

Amid this situation, the Indonesian economy grew quite well by 5.03% in 2024, with a controlled inflation rate of 1.57%, supported by domestic consumption that remained strong.

● Tinjauan Industri

Industry Overview

Pada tahun 2024, industri infrastruktur telekomunikasi Indonesia masih dipengaruhi oleh dampak dari konsolidasi di industri seluler. Namun demikian, tren operator seluler (*mobile network operator/MNO*) untuk semakin efisien dalam membelanjakan modalnya juga turut memengaruhi meningkatnya permintaan terhadap infrastruktur pendukung telekomunikasi. Sepanjang tahun 2024, industri menara mampu mencatat pertumbuhan yang cukup baik seiring bertumbuhnya industri seluler. Seiring permintaan layanan *mobile data* yang terus meningkat, berdasar data Busat Pusat Statistik (BPS), industri telekomunikasi di Indonesia tercatat mengalami pertumbuhan sebesar 7,57% dibanding tahun sebelumnya.

Pertumbuhan industri telekomunikasi ini didukung oleh jumlah pengguna internet di Indonesia yang diperkirakan mencapai 221,5 juta pada tahun 2024, dengan tingkat penetrasi sebesar 79,5% dari total populasi. Meskipun demikian, pemerataan akses internet masih menjadi tantangan utama. Wilayah seperti Maluku dan Papua memiliki tingkat penetrasi internet di bawah rata-rata sebesar 69,9%, lebih rendah dibandingkan dengan Jawa yang mencapai 83,6%. Perbedaan ini menunjukkan perlunya upaya lebih lanjut dalam mengatasi kesenjangan digital, terutama di wilayah-wilayah pedesaan.

Selain itu, tantangan industri tidak hanya sebatas pemerataan akses, tetapi juga peningkatan kualitas dan pengembangan infrastruktur yang terintegrasi, sehingga mendorong terciptanya efisiensi industri yang pada gilirannya akan menciptakan layanan telekomunikasi yang luas, murah, dan berkualitas.

In 2024, Indonesia's telecommunications infrastructure industry was still affected by the impact of consolidation in the cellular industry. However, mobile network operators (MNOs) trend to spend capital more efficiently contributed to the growing demand for telecommunications supporting infrastructure. Throughout 2024, the tower industry recorded relatively good growth, along with the cellular industry growth. Driven by the increasing demand for mobile data services, the telecommunications industry in Indonesia recorded a growth of 7.57% compared to that of the previous year, based on data from Statistics Indonesia (BPS).

Indonesia's telecommunications industry growth was supported by a projected 221.5 million internet users in 2024, at a penetration rate of 79.5% of the total population. However, equalizing internet access was still a major challenge. Internet penetration rates at regions such as Maluku and Papua were below the average of 69.9%, lower than in Java which reached 83.6%. This disparity highlights the necessity for further efforts to overcome the digital divide, particularly in rural areas.

Furthermore, the industry challenges are not only about providing equal access, but also about improving the quality and developing integrated infrastructure; thus, encouraging the creation of industrial efficiency which in turn will create widespread, cost-effective, and high-quality telecommunications services.

Kemampuan Membayar Utang

Kemampuan Perseroan dalam memenuhi kewajiban finansial tercermin dari kesehatan solvabilitas, profitabilitas, dan efektivitas dalam mengelola piutang. Kinerja keuangan Mitratel menunjukkan struktur modal yang solid, dengan rasio utang terhadap ekuitas yang stabil dalam 0,5x selama 2 tahun terakhir. Peningkatan rasio ini terutama disebabkan oleh penambahan utang berbunga dalam rangka pembiayaan ekspansi strategis dan akuisisi aset yang mendukung pertumbuhan jangka panjang Perseroan.

Debt Service Ability

The Company's ability to meet its financial obligations is reflected in its solvency, profitability, and effectiveness in managing receivables. Mitratel's financial performance demonstrates a solid capital structure, with a debt-to-equity ratio remaining stable around 0.5x over the past 2 years. The increase in this ratio was primarily due to the addition of interest-bearing debt as part of financing strategic expansion and asset acquisitions that support the Company's long-term growth.

Selain itu, rasio utang terhadap EBITDA yang berada di kisaran 2,3x mencerminkan posisi keuangan yang sehat, memungkinkan Perseroan untuk tetap fleksibel dalam ekspansi bisnis. Selama 2 tahun terakhir, Mitratel semakin mengoptimalkan profitabilitas dengan memperkuat bisnis penyewaan menara serta menerapkan strategi efisiensi operasional melalui kemitraan inovatif. Langkah-langkah ini semakin memperkuat daya saing Perseroan di industri infrastruktur telekomunikasi.

Kolektibilitas Piutang

Hingga akhir tahun 2024, Mitratel mencatatkan piutang usaha – neto sebesar Rp2.004 miliar. Mayoritas dari piutang tersebut berada dalam kategori lancar, dengan usia kurang dari 3 bulan, mencerminkan efektivitas Perseroan dalam manajemen kredit dan penagihan. Kinerja ini menunjukkan bahwa Mitratel mampu mempertahankan arus kas yang sehat dan mengelola risiko kredit dengan baik, sehingga mendukung stabilitas keuangan perusahaan secara keseluruhan.

Struktur Modal dan Kebijakan Struktur Modal

Kebijakan Manajemen atas Struktur Permodalan

Manajemen menentukan struktur permodalan yang optimal berdasarkan rasio pengungkit atau leverage yang dipersyaratkan pihak kreditur sebagai *debt covenant* seperti *debt to equity ratio* <5,00, *debt to EBITDA* <5,00, *net debt to EBITDA* <5,00, dan *Debt Coverage Service Ratio (DSCR)* >1,00.

Dasar Pemilihan Kebijakan Manajemen atas Struktur Modal

Manajemen menjaga struktur modal berdasarkan rasio pembatasan utang atau *debt covenant* dengan pihak kreditur sebagai kontrol terhadap pemenuhan syarat kepada pihak kreditur.

Furthermore, the debt-to-EBITDA ratio, which was around 2.3x, reflects a sound financial position, allowing the Company to remain flexible in its business expansion. Over the past 2 years, Mitratel has increasingly optimized profitability by strengthening its tower leasing business and implementing operational efficiency strategies through innovative partnerships. These initiatives further enhance the Company's competitiveness in the telecommunications infrastructure industry.

Receivables Collectibility

By the end of 2024, Mitratel recorded net trade receivables of Rp2,004 billion. The majority of these receivables fall into the current category, with an aging of less than 3 months, reflecting the Company's effectiveness in credit management and collection. Meanwhile, receivables aged more than 6 months remained relatively low at Rp3,254 million. This performance indicates that Mitratel can maintain healthy cash flow and effectively manage credit risk, thereby supporting the Company's overall financial stability.

Capital Structure and Policy on the Capital Structure

Tidak terdapat informasi dan fakta material setelah tanggal laporan akuntan pada tahun 2024.

Prospek Usaha

Proyeksi pertumbuhan ekonomi global dan nasional untuk tahun 2025 menunjukkan dinamika yang perlu dicermati oleh pelaku ekonomi dan pembuat kebijakan. Dana Moneter Internasional (IMF) dalam laporannya memprediksi bahwa pertumbuhan ekonomi global akan stagnan di angka 3,2% pada tahun 2025, sedikit meningkat dari proyeksi sebelumnya sebesar 3,2%. Revisi ini didorong oleh peningkatan proyeksi pertumbuhan ekonomi Amerika Serikat, meskipun risiko geopolitik dan proteksionisme perdagangan tetap menjadi tantangan yang dapat menghambat laju pertumbuhan ekonomi dunia.

Di tengah tantangan global tersebut, pemerintah Indonesia optimis bahwa perekonomian nasional akan tumbuh positif. Dalam Rancangan Anggaran Pendapatan dan Belanja Negara (RAPBN) 2025, pemerintah menargetkan pertumbuhan ekonomi sebesar 5,2%. Target ini sejalan dengan proyeksi Bank Indonesia yang memperkirakan pertumbuhan ekonomi nasional berada dalam rentang 5,1% hingga 5,5% pada tahun 2025. Optimisme pemerintah didasarkan pada upaya menjaga stabilitas ekonomi dan mendorong permintaan domestik melalui strategi seperti pengendalian inflasi, penciptaan lapangan kerja, serta penyaluran bantuan sosial dan subsidi untuk menjaga daya beli masyarakat.

Dari sisi kinerja industri infrastruktur telekomunikasi Indonesia, prospek usaha pada tahun 2025 diproyeksikan cerah. Analisis memprediksi sektor telekomunikasi Indonesia akan tumbuh sebesar 6%-8% year-on-year pada tahun 2025, mencapai nilai Rp320 triliun. Pertumbuhan ini didorong oleh percepatan digitalisasi dan kebutuhan akan infrastruktur telekomunikasi yang andal. Selain itu, Penetrasi 5G di Indonesia diproyeksikan meningkat signifikan, dengan Telkomsel menargetkan perluasan layanan 5G ke 76 kota/kabupaten pada tahun 2025.

Peningkatan ini membuka peluang bagi Mitratel untuk menyediakan infrastruktur pendukung, seperti menara telekomunikasi dan jaringan serat optik yang diperlukan untuk implementasi 5G. Kemudian, konsolidasi di industri telekomunikasi, seperti merger antara XL Axiata dan Smartfren pada Desember 2024 dengan nilai transaksi mencapai Rp104 triliun, menciptakan entitas baru yang berpotensi meningkatkan permintaan akan infrastruktur telekomunikasi. Mitratel dapat memanfaatkan peluang ini dengan menawarkan solusi infrastruktur yang komprehensif.

Business Prospect

The projected global and national economic growth for 2025 presents dynamics that need to be closely monitored by economic players and policymakers. In its report, the International Monetary Fund (IMF) predicts that global economic growth will stagnate at 3.2% in 2025, slightly increasing from the previous projection of 3.2%. This revision is driven by an improved growth outlook for the United States, although geopolitical risks and trade protectionism remain challenges that could hinder global economic growth.

Amid these global challenges, the Indonesian government remains optimistic about positive national economic growth. In the 2025 Draft State Budget (RAPBN), the government targets economic growth of 5.2%. This target aligns with Bank Indonesia's projection, which estimates national economic growth in the range of 5.1% to 5.5% in 2025. The government's optimism is based on efforts to maintain economic stability and boost domestic demand through strategies such as inflation control, job creation, and the distribution of social assistance and subsidies to support people's purchasing power.

In terms of the performance of Indonesia's telecommunications infrastructure industry, the business prospect for 2025 is projected to be promising. Analysis predicts that Indonesia's telecommunications sector will grow by 6%-8% year-on-year in 2025, reaching a value of Rp320 trillion. This growth is driven by the acceleration of digitalization and the increasing demand for reliable telecommunications infrastructure. Additionally, 5G penetration in Indonesia is expected to rise significantly, with Telkomsel targeting the expansion of 5G services to 76 cities/regencies by 2025.

This development presents an opportunity for Mitratel to provide essential supporting infrastructure, such as telecommunications towers and fiber optic networks required for 5G implementation. Then, consolidation in the telecommunications industry, such as the merger between XL Axiata and Smartfren in December 2024 with a transaction value reaching Rp104 trillion, created a new entity that has the potential to increase demand for telecommunications infrastructure. Mitratel can seize this opportunity by offering comprehensive infrastructure solutions.

Meskipun prospek pertumbuhan positif, Mitratel tetap mempertimbangkan tantangan ekonomi global, seperti fluktuasi nilai tukar, inflasi, dan ketidakpastian geopolitik yang dapat memengaruhi biaya operasional dan investasi. Namun, dengan strategi ekspansi yang terukur dan diversifikasi portofolio, Mitratel berada pada posisi yang baik untuk mengatasi tantangan ini dan memanfaatkan peluang pertumbuhan di pasar domestik dan internasional.

Selain itu, persyaratan telah diperkenalkan untuk mewajibkan pengungkapan ketika suatu kewajiban timbul dari pinjaman perjanjian diklasifikasikan sebagai tidak lancar dan hak entitas untuk menunda penyelesaian bergantung pada kepatuhan terhadap persyaratan di masa depan dalam waktu 12 bulan. Amendment of PSAK 201, "Non-Current Liabilities with Covenants"	The amendments specify the requirements for classifying liabilities as current or non-current and clarify: • What is meant by a right to defer settlement; • The right to defer must exist at the end of the reporting period; • Classification is not affected by the likelihood that an entity will exercise its deferral right; and • That if an embedded derivative in a convertible liability is considered as an equity instrument, the terms of the liability would not affect its classification as current or non-current. In addition, a requirement has been introduced to require disclosure when a liability arising from a loan agreement is classified as non-current and the entity's right to defer settlement is contingent on compliance with future covenants within 12 months.	The amendments are not expected to have an impact on the consolidated financial statements.

Amendment of PSAK 116, "Lease Liability in a Sale and Leaseback"	The amendment specifies the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction, to ensure the seller-lessee does not recognise any amount of the gain or loss that relates to the right of use it retains. Jenis dan Mitigasi Risiko

Berdasarkan kajian yang dilakukan selama tahun 2024, risiko-risiko yang dihadapi Perseroan serta upaya mitigasinya diuraikan sebagai berikut.

Types and Risk Mitigation

Based on the assessment conducted throughout 2024, the risks faced by the Company and their mitigation efforts are outlined as follows.

Jenis Risiko: Risiko yang Berpengaruh Signifikan Terhadap Kelangsungan Usaha Type of Risk: Major Risks that Have Significant Impact on Business Continuity

Risiko yang Dihadapi: Risiko persaingan dan tekanan harga yang ketat dalam industri penyewaan menara telekomunikasi.
Risk to be Faced: Risk of intense competition and price pressure in the telecommunication tower leasing industry.

Dampak Impact	Tekanan persaingan dapat menimbulkan dampak merugikan yang material terhadap harga sewa dan pendapatan jasa Perseroan, dan dapat menyebabkan pelanggan lama Perseroan tidak memperbarui perjanjian sewa mereka, atau mendorong pelanggan baru untuk menyewa menara telekomunikasi dari pesaing Perseroan.	Competitive pressures may have a material adverse effect on the Company's rental prices and service revenues and may cause the Company's existing customers not to renew their lease agreements or encourage new customers to rent telecommunications towers from the Company's competitors.
Mitigasi Mitigation	- Monitoring berkelanjutan atas perkembangan industri seluler dan menara telekomunikasi terutama terkait tekanan harga yang akan terus berlangsung. - Menyelaraskan strategi pemasaran untuk memenuhi kebutuhan cakupan dan kapasitas operator telekomunikasi dan selektif membangun atau mengakuisisi lokasi menara yang dapat memenuhi kapasitas, cakupan, dan ekspansi jaringan operator telekomunikasi. - Meningkatkan komunikasi dengan operator telekomunikasi serta pihak lain untuk menunjukkan/menggali peluang dan manfaat yang bisa diraih dalam bekerja sama membangun hubungan bisnis yang saling menguntungkan dan adil. - Menjalin kerja sama dengan mitra terbaik untuk menemukan model bisnis yang tepat dalam mengoptimalkan pemanfaatan infrastruktur menara dan bisnis terkaitnya. - Mencari alternatif bisnis baru yang bisa dilakukan dengan memanfaatkan aset-aset Mitratel dengan tetap memperhatikan <i>healthy, profitability, dan growth</i>.	- Continuous monitoring of developments in the cellular and telecommunications tower industry, especially in relation to ongoing pricing pressures. - Harmonizing marketing strategies to meet the coverage and capacity needs of telecommunications operators and selectively building or acquiring tower sites that can meet the capacity, coverage, and network expansion of telecommunications operators. - Enhancing communication with telecommunications operators and other parties to show/explore the opportunities and benefits that can be achieved in working together to build a mutually beneficial and fair business relationship. - Establishing cooperation with the best partners to find the right business model in optimizing the utilization of tower infrastructure and its related businesses. - Looking for new business alternatives that can be done by utilizing Mitratel's assets while still paying attention to health, profitability, and growth.

Jenis Risiko: Risiko Usaha yang Bersifat Material Baik Secara Langsung maupun Tidak Langsung yang Dapat Memengaruhi Hasil Usaha dan Kondisi Keuangan Perseroan

Type of Risk: Material Business Risks that Can Directly or Indirectly Affect the Company's Business Results and Financial Condition

Risiko yang Dihadapi: Sebagian besar pendapatan usaha Perseroan diperoleh dari sejumlah kecil pelanggan.
Risk to be Faced: Most of the Company's revenues are derived from a small number of customers.

Dampak Impact	Apabila salah satu dari pelanggan tidak bersedia atau tidak mampu melaksanakan kewajibannya berdasarkan perjanjian penyewaan menara telekomunikasi dan kegagalan Perseroan dalam memperoleh perpanjangan perjanjian sewa menara telekomunikasi yang berjalan atau menegosiasikan syarat dan ketentuan yang menguntungkan atas perpanjangan tersebut dapat menyebabkan pendapatan usaha, kinerja operasi, kondisi keuangan, dan likuiditas Perseroan dapat mengalami dampak merugikan yang material.	If one of the customers is unwilling or unable to perform its obligations under the telecommunication tower lease agreement and the Company fails to obtain an extension of the current telecommunication tower lease agreement or negotiate favorable terms and conditions for such extension, the Company's revenues, operating performance, financial condition and liquidity may be materially adversely affected.
Mitigasi Mitigation	- Monitoring berkelanjutan atas perkembangan industri seluler terutama potensi merger namun seiring dengan kemungkinan tumpang tindih cakupan, entitas gabungan akan memilih untuk pindah ke menara telekomunikasi untuk memenuhi kebutuhan kapasitas atau meningkatkan cakupan secara keseluruhan. - Menjaga komunikasi dengan operator telekomunikasi untuk memahami akan cakupan, kapasitas, serta peluang kolokasi. - Mencari pelanggan layanan lain-lain meliputi project solution, managed service, layanan digital, dan solusi fiber. - Monitoring berkelanjutan kemampuan pelanggan saat penerimaan order. - Melakukan kontrak jangka panjang dengan pelanggan. - Membuat kesepakatan denda pembatalan atau penghentian kontrak sebelum masa sewa habis.	- Continuous monitoring of mobile industry developments especially potential mergers but along with the possibility of overlapping coverage, the combined entity will choose to move to telecommunication towers to fulfill capacity needs or improve overall coverage. - Maintaining communication with telecommunication operators to understand coverage, capacity and collocation opportunities. - Seeking customers for miscellaneous services including project solutions, managed services, digital services, and fibersolutions. - Continuous monitoring of customer capabilities during order acceptance. - Entering into long-term contracts with customers. - Making agreements on cancellation penalties or termination of contracts before the lease expires.

Risiko yang Dihadapi: Merger atau konsolidasi antar pelanggan Perseroan.
Risk to be Faced: Merger or consolidation between the Company's customers.

Dampak Impact	Konsolidasi yang signifikan di antara pelanggan Perseroan dapat menyebabkan penurunan permintaan dari Perseroan yang terkonsolidasi, mengingat site tertentu mungkin akan menjadi tumpang tindih atau akan terdapat ruang menara telekomunikasi tambahan yang diperoleh dari konsolidasi tersebut. Selain itu, konsolidasi dapat menyebabkan penurunan belanja modal di masa depan secara keseluruhan apabila Perseroan-Perseroan yang terkonsolidasi tersebut memiliki rencana ekspansi yang serupa. Pelanggan Perseroan mungkin memutuskan untuk tidak memperpanjang perjanjian sewa dengan Perseroan akibat konsolidasi tersebut. Pengakhiran dini dalam jumlah yang signifikan akibat konsolidasi industri tersebut dapat menimbulkan dampak merugikan yang material terhadap pendapatan usaha dan arus kas Perseroan, yang pada gilirannya dapat menimbulkan dampak merugikan yang material terhadap kegiatan usaha, kondisi keuangan, kinerja operasi, dan likuiditas Perseroan.	Significant consolidation among the Company's customers may lead to a decrease in demand from the consolidated Company, as certain sites may become overlapping or there will be additional telecommunication tower space gained from such consolidation. In addition, consolidation may lead to an overall decrease in future capital expenditures if the consolidated Companies have similar expansion plans. The Company's customers may decide not to renew their lease agreements with the Company due to the consolidation. A significant number of early terminations due to industry consolidation could have a material adverse effect on the Company's operating revenues and cash flows, which in turn could have a material adverse effect on the Company's business, financial condition, operating performance, and liquidity.
Mitigasi Mitigation	- Monitoring berkelanjutan atas perkembangan industri seluler terutama potensi merger namun seiring dengan kemungkinan tumpang tindih cakupan, entitas gabungan akan memilih untuk pindah ke menara telekomunikasi untuk memenuhi kebutuhan kapasitas atau meningkatkan cakupan secara keseluruhan. - Menjaga komunikasi dengan operator telekomunikasi untuk memahami akan cakupan, kapasitas, serta peluang kolokasi. - Mencari pelanggan layanan lain-lain meliputi project solution, managed service, layanan digital, dan solusi fiber. - Melakukan kontrak jangka panjang dengan pelanggan. - Membuat kesepakatan denda pembatalan atau penghentian kontrak sebelum masa sewa habis.	- Continuous monitoring of mobile industry developments especially potential mergers but along with the possibility of overlapping coverage, the combined entity will choose to move to telecommunication towers to fulfill capacity needs or improve overall coverage. - Maintaining communication with telecommunication operators to understand coverage, capacity and collocation opportunities. - Seeking customers for other services including project solutions, managed services, digital services, and fiber solutions. - Entering into long-term contracts with customers. - Making agreements on cancellation penalties or termination of contracts before the lease expires.

Risiko yang Dihadapi: Mengingat ekspektasi jangka panjang terkait pendapatan usaha dari penyewa, Perseroan terpapar risiko terkait kelayakan kredit dan kekuatan keuangan para penyewa Perseroan.
Risk to be Faced: Given the long-term expectation of business income from tenants, the Company is exposed to risks related to the creditworthiness and financial strength of its tenants.

Dampak Impact	Apabila pelanggan atau pelanggan potensial Perseroan tidak mampu menggalang modal yang cukup untuk mendanai rencana usahanya, para pelanggan tersebut mungkin mengurangi belanja modalnya. Hal ini dapat menimbulkan dampak merugikan yang material terhadap permintaan atas site telekomunikasi Perseroan. Apabila satu atau lebih dari pelanggan signifikan Perseroan mengalami kesulitan keuangan sebagai akibat dari kemerosotan ekonomi yang berkepanjangan atau faktor lainnya, hal ini dapat menimbulkan piutang tak tertagih dari pelanggan Perseroan, yang pada gilirannya dapat menimbulkan dampak merugikan yang material terhadap kegiatan usaha, kondisi keuangan, kinerja operasi, dan likuiditas Perseroan.	If the Company's customers or potential customers are unable to raise sufficient capital to fund their business plans, they may reduce their capital expenditures. This could have a material adverse effect on demand for the Company's telecommunications sites. If one or more of the Company's significant customers experience financial difficulties as a result of a prolonged economic downturn or other factors, this could result in bad debts from the Company's customers, which in turn could have a material adverse effect on the Company's business, financial condition, operating performance and liquidity.
Mitigasi Mitigation	- Monitoring berkelanjutan atas kekuatan keuangan dari pelanggan yang dilakukan setiap kuartal sesuai dengan kebijakan Perseroan. - Menjaga komunikasi dengan pelanggan untuk memahami kekuatan keuangan. - Memberi insentif atau kelonggaran pembayaran sesuai dengan ketentuan internal.	- Continuous monitoring of the financial strength of customers conducted every quarter in accordance with the Company's policy. - Maintaining communication with customers to understand financial strength. - Providing incentives or payment concessions in accordance with internal provisions.

Risiko yang Dihadapi: Risiko kegagalan memperpanjang perjanjian sewa tanah, atau memperpanjang tersebut dengan syarat dan ketentuan yang layak secara komersial, atau melindungi hak atas properti riil Perseroan.
Risk to be Faced: Risk of failure to extend the land lease agreement, or extend it on commercially viable terms and conditions, or protect the rights to the Company's real property.

Dampak Impact	Apabila Perseroan tidak mampu memperoleh, memperpanjang, atau melindungi hak sewa atas lahan yang merupakan site menara telekomunikasi karena pengakhiran perjanjian sewa tanah Perseroan, termasuk pengakhiran akibat pelanggaran nyata maupun dugaan pelanggaran, kegagalan memperpanjang perjanjian sewa tersebut dengan persyaratan yang wajar secara komersial, kurangnya kelengkapan dokumentasi atau penundaan dalam memperoleh dokumentasi yang diperlukan, terjadi perselisihan terkait hak kepemilikan atas tanah atau hal-hal terkait lainnya maka berdampak pada pembongkaran dan relokasi menara telekomunikasi, mengganggu kemampuan Perseroan untuk beroperasi, pelanggaran atau pengakhiran pelanggan Perseroan berdasarkan Perjanjian Sewa Induk (PSI), dan pengembalian biaya sewa dibayar di muka yang belum digunakan.	In the event that the Company is unable to obtain, extend, or protect the lease rights to the land that constitutes the telecommunication tower site due to the termination of the Company's land lease agreement, including termination due to actual or alleged breach, failure to extend the lease agreement on commercially reasonable terms, lack of complete documentation or delay in obtaining the necessary documentation, disputes related to land ownership rights or other related matters, it will have an impact on the demolition and relocation of telecommunication towers, disrupt the Company's ability to operate, breach or termination of the Company's customers under the Master Lease Agreement (PSI), and return of unused prepaid rental fees.
Mitigasi Mitigation	- Menerapkan kebijakan kontrak sewa jangka panjang berdurasi di atas 10 tahun. - Melakukan diskusi dengan pemilik lahan dalam 2 tahun sebelum berakhir masa perjanjian sehingga memiliki opsi untuk perpanjangan dini, pembahasan dini relokasi dengan pelanggan. - Memperkenalkan batasan eskalasi secara lebih luas kepada para pemilik lahan atas biaya sewa tanah pada saat perpanjangan agar memiliki kendali yang lebih luas dan masih sesuai dengan laju inflasi. - Memantau secara ketat site-site yang berpotensi mengalami kegagalan sewa lahan. - Melakukan pendekatan secara interpersonal dan bekerja sama dengan aparat setempat.	- Implementing a policy of long-term lease contracts with a duration of more than 10 years. - Conducting discussions with landlords in the 2 years prior to the expiry of the agreement so as to have options for early renewal, early relocation discussions with customers. - Introducing broader escalation limits to landlords on ground rent at the time of renewal in order to have more control and still keep pace with inflation. - Closely monitored sites with the potential for lease failure. - Conducting interpersonal engagement and work closely with local authorities.

Risiko yang Dihadapi: Risiko penurunan permintaan terhadap komunikasi nirkabel atau penurunan permintaan akan site menara telekomunikasi.
Risk to be Faced: Risk of decreased demand for wireless communications or decreased demand for telecommunication tower sites.

Dampak Impact	Apabila industri jasa komunikasi nirkabel Indonesia tidak terus bertumbuh atau bertumbuh dengan laju yang lebih lambat dari perkiraan sebelumnya, karena: • Penurunan belanja modal operator telekomunikasi. • Penurunan pertumbuhan penggunaan data atau pertumbuhan industri komunikasi nirkabel secara umum. • Perkembangan merugikan terkait perizinan dari pemerintah atas spektrum dan telekomunikasi dan peraturan lainnya. • Merger atau konsolidasi antar operator telekomunikasi. • Peningkatan penggunaan jaringan bersama, perjanjian <i>roaming</i> atau <i>reseller</i> di antara operator telekomunikasi. • Penundaan atau perubahan dalam peluncuran 5G atau teknologi komunikasi lainnya. • Pergeseran strategi operator telekomunikasi yang merugikan terkait kepemilikan atau pembagian ruang dalam menara telekomunikasi. • Perkembangan merugikan terkait peraturan pembagian zona, lingkungan, kesehatan, dan peraturan pemerintah lainnya. • Penurunan permintaan pelanggan atas jasa komunikasi nirkabel. • Penurunan kondisi keuangan secara umum yang dialami operator telekomunikasi akibat tarif yang menurun, konvergensi media atau faktor-faktor lainnya yang menyebabkan tekanan penetapan harga kembali pada penyedia menara telekomunikasi. • Kebangkitan teknologi pengganti (contohnya: <i>Low Earth Orbit (LEO) Satellite</i> atau Satelit Orbit Bumi Rendah). Maka kegiatan usaha, prospek, kinerja operasi, dan kondisi keuangan Perseroan akan mengalami dampak merugikan.	If Indonesia's wireless communications services industry does not continue to grow or grows at a slower pace than previously expected, due to: • Decreased capital expenditures of telecommunications operators. • A decline in data usage growth or the growth of the wireless communications industry in general. • Adverse developments related to government licensing of spectrum and telecommunications and other regulations. • Mergers or consolidations among telecommunications operators. • Increased use of shared networks, roaming or reseller agreements among telecom operators. • Delays or changes in the rollout of 5G or other communications technologies. • Adverse shifts in telecommunications operator strategies regarding ownership or sharing of space on telecommunications towers. • Adverse developments related to zoning, environmental, health and other government regulations. • Decrease in customer demand for wireless communication services. • A general deterioration in the financial condition of telecommunications operators due to declining tariffs, media convergence or other factors that cause re-pricing pressure on telecommunications tower providers. • The rise of substitute technologies (eg: <i>Low Earth Orbit (LEO) Satellite</i>). As a result, the Company's business activities, prospects, operating performance, and financial condition may be adversely affected.
Mitigasi Mitigation	• Melakukan pemantauan berkelanjutan atas perkembangan industri seluler dan menara telekomunikasi terutama terkait penurunan permintaan komunikasi nirkabel dan atau penurunan permintaan site menara telekomunikasi. • Menyusun langkah strategis dengan adaptasi atas <i>disruptive</i> teknologi dibutuhkan. • Mengembangkan potensi teknologi baru, meliputi <i>Fiber-To-Tower (FTT)</i>, peningkatan <i>site</i> makro 5G, dan <i>digital service</i>.	• Conducting continuous monitoring of the development of the cellular industry and telecommunications towers, especially related to the decline in demand for wireless communications and or the decline in demand for telecommunications tower sites. • Developing strategic steps with adaptation to disruptive technology is needed. • Developing potential new technologies, including <i>Fiber-To-Tower (FTT)</i>, 5G macro site upgrades, and digital services.

Risiko yang Dihadapi: Kenaikan beban operasi dapat menurunkan margin operasi Perseroan.
Risk to be Faced: An increase in operating expenses may reduce the Company's operating margin.

Dampak Impact	Kenaikan beban operasi Perseroan karena tidak dapat menjamin bahwa strategi untuk meningkatkan margin EBITDA akan berhasil, beban operasi aktual tidak akan mengalami peningkatan di masa depan atau tidak berhasil meneruskan kenaikan beban operasi tersebut dan membebankannya kepada pelanggan akan menurunkan margin operasi Perseroan dan menimbulkan dampak merugikan material terhadap kegiatan usaha, kondisi keuangan, kinerja operasi, dan likuiditas Perseroan, dan pada akhirnya nilai saham.	An increase in the Company's operating expenses due to the inability to guarantee that the strategy to improve EBITDA margin will be successful, actual operating expenses will not increase in the future or the inability to pass on the increase in operating expenses to customers will reduce the Company's operating margin and have a material adverse effect on the Company's business, financial condition, operating performance, and liquidity, and ultimately share value.

Mitigasi Mitigation	• <i>Mapping issue</i> yang menyebabkan beban operasi meningkat. • Mengoptimalkan biaya sewa lahan dengan kebijakan kontrak sewa jangka panjang berdurasi 10 tahun, melakukan diskusi dengan pemilik lahan dalam 2 tahun sebelum berakhir masa perjanjian dan memperkenalkan batasan eskalasi secara lebih luas kepada para pemilik lahan. • Meningkatkan efisiensi operasi dan pemeliharaan melalui optimalisasi manajemen pemasok, pengurangan <i>trouble ticket</i>, serta memprioritaskan belanja modal untuk pemeliharaan preventif. • Memperkenalkan inisiatif efisiensi energi dengan penggunaan baterai lithium dan penyewaan generator untuk menara <i>off-grid</i>. • Melakukan transformasi digital untuk menyempurnakan proses bisnis melalui integrasi sistem.	• Mapping issues that cause operating expenses to increase. • Optimizing land lease costs with a policy of long-term lease contracts with a duration of 10 years, conducting discussions with landowners in the 2 years before the end of the agreement period and introducing escalation limits more broadly to landowners. • Improving operation and maintenance efficiency through optimizing supplier management, reducing trouble tickets, and prioritizing capital expenditure for preventive maintenance. • Introducing energy efficiency initiatives with the use of lithium batteries and generator leasing for off-grid towers. • Undertaking digital transformation to enhance business processes through system integration.

Risiko yang Dihadapi: Perseroan belum memperoleh persetujuan dan perizinan yang diperlukan untuk sebagian site menara telekomunikasi Perseroan.
Risk to be Faced: The Company has not obtained the necessary approvals and licenses for some of the Company's telecommunication tower sites.

Dampak Impact	Apabila persetujuan dan perizinan tersebut tidak dapat diperoleh, pemerintah setempat dapat menerbitkan pemberitahuan untuk membongkar dan memindahkan menara-menara telekomunikasi Perseroan dan mengenakan penalti, seperti teguran, peringatan, dan denda, atas ketidakpatuhan terhadap ketentuan perizinan dan persetujuan yang terkait dan memberikan hak kepada pelanggan untuk mengakhiri perjanjian atas site tersebut apabila pelanggaran tersebut tidak diperbaiki dalam periode pemulihan yang telah disetujui.	If such approvals and licenses cannot be obtained, the local government may issue notices to dismantle and remove the Company's telecommunication towers and impose penalties, such as reprimands, warnings and fines, for non-compliance with the terms of the relevant licenses and approvals and entitle the customer to terminate the agreement for the site if the violations are not remedied within the agreed remedy period.
Mitigasi Mitigation	• Monitoring berkelanjutan atas data aset dan kelengkapan perizinan menara telekomunikasi. • Mengimplementasikan kebijakan relokasi dan penguatan aset. • Mengimplementasikan program digitalisasi aset dan skema baru sewa lahan. • Melakukan koordinasi dengan regulator atas analisa dampak peraturan yang akan ditetapkan memberikan manfaat positif bagi, industri, serta bagi masyarakat. • Memilih mitra perizinan dengan tingkat keberhasilan yang tinggi.	• Continuous monitoring of asset data and completeness of telecommunication tower licenses. • Implementing asset relocation and retrofitting policies. • Implementing asset digitization program and new land lease scheme. • Coordinating with regulators to analyze the impact of regulations to provide positive benefits to the industry and society. • Selecting licensing partners with high success rate.

Risiko yang Dihadapi: Perseroan mungkin menghadapi perlawanan masyarakat setempat di sebagian site menara telekomunikasi Perseroan.
Risk to be Faced: The Company may face resistance from local communities at some of the Company's telecommunication tower sites.

Dampak Impact	Sebagai akibat perlawanan masyarakat setempat akibat imbas petir di kawasan padat penduduk, keselamatan di radius tinggi tower, dan kekhawatiran mengenai dugaan risiko kesehatan yang mungkin timbul, maka pemerintah setempat dapat meminta untuk membongkar dan merelokasi menara-menara telekomunikasi tertentu. Hal ini dapat menimbulkan dampak merugikan terhadap kondisi keuangan, kinerja operasi, dan likuiditas.	As a result of local community opposition due to lightning strikes in densely populated areas, safety at high tower radii, and concerns regarding potential health risks, local governments may request the dismantling and relocation of certain telecommunications towers. This could have an adverse impact on our financial condition, operating performance, and liquidity.
Mitigasi Mitigation	• Menyediakan layanan <i>helpdesk</i>, <i>digital touchpoint</i>, <i>customer service</i>, dan penguatan struktur tim area dan dalam penyelesaian isu dengan pelanggan dan warga. • Melakukan sosialisasi dan konsultasi interpersonal kepada warga serta pelaksanaan program CSR. • Menjalin kerja sama dan kolaborasi dengan instansi pemerintahan untuk menjamin kelancaran perizinan. • Ikut dalam program pengembangan wilayah Non-3T.	• Providing helpdesk services, digital touchpoints, customer service, and strengthening the area team structure and in resolving issues with customers and residents. • Conducting dissemination and interpersonal consultation to residents as well as the implementation of CSR programs. • Establishing cooperation and collaboration with government agencies to ensure smooth licensing. • Participating in the Non-3T area development program.

Risiko yang Dihadapi: Perseroan mungkin tidak mampu mengelola pertumbuhan Perseroan secara efektif, termasuk pertumbuhan yang berasal dari kenaikan jumlah penyewa dan pembangunan serta akuisisi menara telekomunikasi.
Risk to be Faced: The Company may not be able to effectively manage the Company's growth, including growth derived from the increase in the number of tenants and the construction and acquisition of telecommunications towers.

Dampak Impact	Apabila Perseroan tidak mampu untuk meningkatkan jumlah kolokasi, membangun site menara telekomunikasi baru, dan mengakuisisi site menara telekomunikasi dari penyedia menara telekomunikasi independen dan operator telekomunikasi karena tunduk pada risiko dan ketidakpastian, termasuk kemampuan Perseroan sehubungan dengan hal-hal berikut ini. • Mengidentifikasi dan memenuhi kebutuhan ekspansi jaringan para operator telekomunikasi. • Meluncurkan menara telekomunikasi <i>built-to-suit</i> secara tepat waktu dan efisien dari segi biaya. • Mengidentifikasi dan mencapai kesepakatan untuk akuisisi yang sesuai dengan persyaratan yang wajar secara komersial. • Memperoleh pendanaan untuk menyelesaikan investasi atau akuisisi yang lebih besar dengan persyaratan yang wajar secara komersial atau sama sekali. • Menghasilkan kas yang memadai untuk memenuhi pembayaran utang dan mengendalikan serta mendanai belanja modal dan operasi Perseroan. • Mengintegrasikan operasi bisnis yang diakuisisi ke dalam organisasi Perseroan. • Mempertahankan dan memperoleh pelanggan dan melakukan penilaian akurat serta memenuhi kebutuhan pelanggan tersebut dan permintaan pasar. • Menetapkan harga produk dan layanan Perseroan pada tingkat harga yang kompetitif. • Merespons perubahan hukum dan peraturan dalam industri penyewaan menara telekomunikasi. • Menarik, mempertahankan, dan melatih tenaga kerja yang memenuhi syarat (termasuk tenaga kerja internal dan sub-kontraktor). Apabila Perseroan gagal menangani salah satu risiko dan ketidakpastian tersebut di atas, kegiatan usaha, prospek, kinerja operasi, dan kondisi Perseroan dapat mengalami dampak merugikan yang material.	If the Company is unable to increase the number of collocations, construct new telecommunication tower sites, and acquire telecommunication tower sites from independent telecommunication tower providers and telecommunication operators because it is subject to risks and uncertainties, including the Company's ability in relation to the following matters. • Identifying and meeting the network expansion needs of telecommunications operators. • Launching built-to-suit telecommunication towers in a timely and cost-efficient manner. • Identifying and reaching agreements for suitable acquisitions on commercially reasonable terms. • Obtaining funding to complete larger investments or acquisitions on commercially reasonable terms or at all. • Generating sufficient cash to meet debt repayments and control and fund the Company's capital expenditure and operations. • Integrating the operations of acquired businesses into the Company's organization. • Retaining and acquiring customers and accurately assessing and meeting the needs of such customers and market demands. • Pricing the Company's products and services at competitive levels. • Responding to legal and regulatory changes in the telecommunication tower leasing industry. • Attracting, retaining, and training a qualified workforce (including internal workforce and sub-contractors). If the Company fails to address any of the risks and uncertainties mentioned above, the Company's business activities, prospects, operating performance, and condition may suffer a material adverse effect.
Mitigasi Mitigation	• Monitoring berkelanjutan atas perkembangan industri seluler, menara telekomunikasi dan kondisi ekonomi domestik, regional dan global. • Menetapkan strategi ekspansi ke bisnis pelengkap untuk menyediakan solusi infrastruktur digital yang menyeluruh dengan merancang pendekatan bertahap untuk mencapai pertumbuhan melalui berbagai pendorong untuk memperluas usaha. • Selektif membangun atau mengakuisisi lokasi menara yang dapat memenuhi kapasitas, cakupan, dan ekspansi jaringan operator telekomunikasi. • Menjaga komunikasi dengan operator telekomunikasi untuk memahami akan cakupan, kapasitas, serta peluang kolokasi. • Mencari pelanggan layanan lain-lain meliputi <i>project solution</i>, <i>managed service</i>, layanan digital, dan solusi fiber. • Melakukan penguatan sumber daya manusia, metodologi, dan proses bisnis terkait inisiasi anorganik, dalam proses <i>due diligence</i>, negosiasi hingga penutupan. • Memvalidasi data pelanggan terkait prospek dan keberlanjutan langganan mereka terhadap site yang akan diakuisisi.	• Continuous monitoring of developments in the mobile industry, telecommunication towers and domestic, regional and global economic conditions. • Establishing expansion strategies into complementary businesses to provide end-to-end digital infrastructure solutions by designing a phased approach to achieve growth through various drivers to expand the business. • Selectively building or acquiring tower sites that can meet the capacity, coverage and network expansion of telecommunications operators. • Maintaining communication with telecommunication operators to understand coverage, capacity, and collocation opportunities. • Seeking customers for other services including project solutions, managed services, digital services, and fiber solutions. • Strengthening human resources, methodologies, and business processes related to inorganic initiatives, in the due diligence process, negotiations until closing. • Validating customer data related to prospects and sustainability of their subscription to the site to be acquired.

Risiko yang Dihadapi: Teknologi baru juga dapat menyebabkan bisnis penyewaan menara telekomunikasi Perseroan menjadi kurang menarik bagi penyewa potensial dan menyebabkan penurunan pendapatan.
Risk to be Faced: New technologies may also cause the Company's telecommunication tower leasing business to become less attractive to potential tenants and cause a decrease in revenue.

Dampak Impact	Apabila teknologi baru dalam industri telekomunikasi memberikan kemudahan bagi <i>Mobile Network Operator</i> (MNO) ataupun Non-MNO dalam menyebarkan jaringannya tanpa memerlukan perangkat yang banyak seperti saat ini dan hanya membutuhkan satu teknologi alternatif maka Perseroan perlu segera beradaptasi dalam kaitannya mengikuti perkembangan teknologi tersebut. Apabila teknologi baru tersebut dapat memancarkan jaringan yang lebih baik melalui angkasa luar seperti satelit dan <i>maintenance</i> yang terbilang lebih jarang karena berada di ruang angkasa maka Perseroan dapat kehilangan minat pelanggan terhadap sewa di tower dengan segala kemungkinan yang sering dialami seperti kondisi geografis, bencana alam yang melanda daratan, ataupun kegiatan warga sekitar di darat. Apabila nantinya perkembangan teknologi semakin maju hingga dapat secara universal merubah frekuensi jaringan yang selama ini ditangkap oleh alat pemancar jaringan yang terpasang di tower maka hal ini semakin besar dampaknya karena MNO/non-MNO akhirnya mengganti perangkat terdahulunya karena tidak dapat menangkap frekuensi baru yang telah ditemukan di masa depan.	If new technology in the telecommunications industry makes it easier for Mobile Network Operators (MNOs) or Non-MNOs to deploy their networks without the need for many devices as it is today and only requires one alternative technology, the Company needs to adapt immediately in order to keep up with these technological developments. If the new technology can transmit a better network through outer space such as satellites and maintenance is fairly rare because it is in space, the Company may lose customer interest in tower rental with all the possibilities that are often experienced such as geographical conditions, natural disasters that hit the land, or activities of local residents on the ground. If in the future technological developments advance to the point that it can universally change the network frequency that has been captured by the network transmitter installed on the tower, this will have a greater impact because MNOs/non-MNOs end up replacing their previous devices because they cannot capture new frequencies that have been discovered in the future.
Mitigasi Mitigation	- Monitoring berkelanjutan atas perkembangan industri seluler, menara telekomunikasi dan kondisi ekonomi domestik, regional dan global. - Menetapkan strategi ekspansi ke bisnis pelengkap untuk menyediakan solusi infrastruktur digital yang menyeluruh dengan merancang pendekatan bertahap untuk mencapai pertumbuhan melalui berbagai pendorong untuk memperluas usaha. - Selektif dalam membangun atau mengakuisisi lokasi menara yang dapat memenuhi kapasitas, cakupan, dan ekspansi jaringan operator telekomunikasi. - Menjaga komunikasi dengan operator telekomunikasi untuk memahami akan cakupan, kapasitas, serta peluang kolokasi. - Mencari pelanggan layanan lain-lain meliputi <i>project solution</i>, <i>managed service</i>, layanan digital, dan solusi fiber.	- Continuous monitoring of developments in the mobile industry, telecommunication towers and domestic, regional and global economic conditions. - Establishing an expansion strategy into complementary businesses to provide comprehensive digital infrastructure solutions by designing a phased approach to achieve growth through various drivers to expand the business. - Selective in building or acquiring tower sites that can meet the capacity, coverage and network expansion of telecommunications operators. - Maintaining communication with telecommunication operators to understand coverage, capacity, and collocation opportunities. - Seeking customers for other services including project solutions, managed services, digital services, and fiber solutions.

Risiko yang Dihadapi: Teknologi baru yang telah dirancang untuk meningkatkan efisiensi jaringan nirkabel dan potensi *active sharing* spektrum nirkabel dapat mengurangi kebutuhan akan layanan nirkabel menara telekomunikasi.
Risk to be Faced: New technologies that have been designed to improve the efficiency of wireless networks and the potential for active sharing of wireless spectrum may reduce the need for telecommunication tower wireless services.

Dampak Impact	Pengenalan teknologi baru yang bertujuan untuk meningkatkan efektivitas jaringan nirkabel, seperti pembagian spektrum aktif dan kemajuan seperti antena <i>multiband</i> dan <i>Massive Multiple-Input Multiple-Output</i> (mMIMO), dapat mengurangi permintaan akan ruang menara. Selain itu, adopsi potensial dari pengaturan pembagian aktif antara operator jaringan seluler (MNO) juga dapat lebih lanjut mengurangi kebutuhan akan ruang menara, yang dapat mengakibatkan penurunan bisnis, kondisi keuangan, dan kinerja operasional Perseroan. Selain itu, munculnya teknologi alternatif, seperti layanan satelit siaran langsung untuk komunikasi nirkabel, juga dapat mengurangi permintaan akan layanan transmisi dan penerimaan berbasis menara, sehingga memengaruhi bisnis, kondisi keuangan, dan kinerja operasional Perseroan.	The introduction of new technologies aimed at improving the effectiveness of wireless networks, such as active spectrum sharing and advances such as multiband antennas and Massive Multiple-Input Multiple-Output (mMIMO), may reduce the demand for tower space. In addition, the potential adoption of active sharing arrangements between mobile network operators (MNOs) may also further reduce the need for tower space, which may result in a decline in the Company's business, financial condition and operating performance. In addition, the emergence of alternative technologies, such as direct broadcast satellite services for wireless communications, may also reduce the demand for tower-based transmission and reception services, thereby affecting the Company's business, financial condition, and operating performance.

Mitigasi Mitigation	- Monitoring berkelanjutan atas perkembangan industri seluler, menara telekomunikasi dan kondisi ekonomi domestik, regional dan global. - Menetapkan strategi ekspansi ke bisnis pelengkap untuk menyediakan solusi infrastruktur digital yang menyeluruh dengan merancang pendekatan bertahap untuk mencapai pertumbuhan melalui berbagai pendorong untuk memperluas usaha. - Selektif dalam membangun atau mengakuisisi lokasi Menara yang dapat memenuhi kapasitas, cakupan, dan ekspansi jaringan operator telekomunikasi. - Menjaga komunikasi dengan operator telekomunikasi untuk memahami akan cakupan, kapasitas, serta peluang kolokasi. - Mencari pelanggan layanan lain-lain meliputi <i>project solution</i>, <i>managed service</i>, layanan digital, dan solusi fiber.	- Continuous monitoring of developments in the mobile industry, telecommunication towers and domestic, regional and global economic conditions. - Establishing expansion strategies into complementary businesses to provide comprehensive digital infrastructure solutions by designing a phased approach to achieve growth through various drivers to expand the business. - Selective in building or acquiring tower sites that can meet the capacity, coverage and network expansion of telecommunications operators. - Maintaining communication with telecommunications operators to understand coverage, capacity, and collocation opportunities. - Seeking customers for other services including project solutions, managed services, digital services, and fiber solutions.

Jenis Risiko: Risiko Umum
Types of Risks: General Risk

Risiko yang Dihadapi: Insiden keamanan siber atau hilangnya informasi identitas pribadi.
Risk to be Faced: Cybersecurity incidents or loss of personally identifiable information.

Dampak Impact	Semakin maraknya kejahatan siber terutama serangan terhadap data pribadi dan bahkan mungkin kedepan kejahatan siber yang lebih besar jangkauannya hingga menyerang ke lini bisnis Perseroan. Apabila kejahatan siber dalam posisi terlambat untuk diamati, dicermati, dan ditanggapi oleh Perseroan maka akan menimbulkan biaya penanganan lebih besar, terganggunya operasional bahkan akan menurunkan reputasi dan kredibilitas Perseroan serta hilangnya pelanggan.	Cybercrime is increasingly prevalent, especially attacks on personal data and maybe even in the future cybercrime will have a greater reach to attack the Company's business lines. If cybercrime is too late to be observed, scrutinized and responded to by the Company, it will lead to higher handling costs, disruption of operations and even reduce the Company's reputation and credibility and loss of customers.
Mitigasi Mitigation	- Memberikan awareness terhadap keamanan siber kepada semua karyawan. - Meningkatkan <i>preventive action</i> berupa <i>vulnerability assessment</i> dan penetration test secara periodik untuk mendeteksi terjadinya insiden dan menerapkan tindakan keamanan secara tepat waktu. - Mengimplementasikan kebijakan data <i>governance</i>, data <i>security</i> and <i>privacy</i>, dan <i>security incident</i>. - Membuat <i>IT Roadmap</i> dan program pemulihan bencana. - Mengambil sertifikasi ISO 27001 tentang Sistem Manajemen Keamanan.	- Providing cybersecurity awareness to all employees. - Increasing preventive actions in the form of vulnerability assessments and penetration tests periodically to detect incidents and implement security measures in a timely manner. - Implementing data governance, data security and privacy, and security incident policies. - Creating IT Roadmap and disaster recovery program. - Taking ISO 27001 certification on Security Management System.

Risiko yang Dihadapi: Kegiatan usaha Perseroan tunduk pada peraturan pemerintah dan perubahan dalam hukum atau peraturan yang berlaku saat ini atau di masa depan.
Risk to be Faced: The Company's business activities are subject to government regulations and changes in current or future laws or regulations.

Dampak Impact	Pelanggan akan meminta untuk membangun site baru dalam rangka ekspansi, maka perlu mempersiapkan untuk menghadapi kondisi di mana harus mempertahankan standar etika bisnis yang tinggi dan kepatuhan terhadap peraturan yang berlaku (termasuk peraturan lingkungan dan zonasi lokal atau nasional) dan penerimaan warga di site baru tersebut tidak lancar, yang akan berdampak pada waktu pengerjaan pembangunan karena terjadi hambatan akses, pencurian, vandalisme, dan lainnya. Apabila tidak mematuhi regulasi di masing-masing daerah maka akan berdampak pada perizinan dari pemerintah.	When a customer requests to build a new site for expansion, it is necessary to prepare for conditions where it is necessary to maintain high standards of business ethics and compliance with applicable regulations (including local or national environmental and zoning regulations) and the acceptance of residents at the new site is not smooth, which will have an impact on the construction time due to access barriers, theft, vandalism, and others. Failure to comply with local regulations will impact government permits.
Mitigasi Mitigation	- Melakukan penandatanganan Kode Etik dan <i>pre-screening</i> integritas karyawan. - Melakukan evaluasi dan integrasi kebijakan, prosedur eksisting dengan kebijakan keberlanjutan. - Mengimplementasikan <i>whistleblowing system</i>. - Melaksanakan penilaian penerapan GCG oleh eksternal. - Menggunakan konsultan hukum yang kompeten dan berpengalaman dengan isu hukum korporasi. - Melakukan koordinasi dengan regulator atas analisa dampak peraturan yang akan ditetapkan memberikan manfaat positif bagi, industri, serta bagi masyarakat.	- Conducting Code of Ethics sign-off and employee integrity pre-screening. - Evaluating and integrating existing policies and procedures with sustainability policies. - Implementing the whistleblowing system (WBS). - Conducting external assessment of GCG implementation. - Utilizing legal consultants who are competent and experienced with corporate law issues. - Coordinating with regulators to analyze the impact of regulations that will be determined to provide positive benefits for the industry and society.

Risiko yang Dihadapi: Perubahan ekonomi domestik, regional, maupun global dapat menimbulkan dampak merugikan yang material terhadap ekonomi Indonesia dan kegiatan usaha Perseroan.

Risk to be Faced: Changes in the domestic, regional and global economy could have a material adverse impact on the Indonesian economy and the Company's business activities.

Dampak Impact	Apabila perekonomian terus bergejolak atau menurun, maka pertumbuhan ekonomi dan posisi fiskal Indonesia, nilai tukar Rupiah dan aspek lainnya dalam perekonomian Indonesia dapat mengalami dampak negatif. Perseroan tidak dapat menjamin bahwa perbaikan dalam kondisi ekonomi Indonesia baru-baru ini dapat tetap dipertahankan. Secara khusus, perubahan dalam lingkungan ekonomi regional atau global yang menyebabkan hilangnya kepercayaan investor dalam sistem keuangan pasar berkembang dan pasar lainnya, atau faktor-faktor lain, dapat meningkatkan volatilitas pasar keuangan Indonesia, menghambat atau membalikkan pertumbuhan ekonomi Indonesia atau menyebabkan krisis ekonomi yang berkepanjangan atau resesi di Indonesia. Setiap kenaikan volatilitas, perlambatan atau pertumbuhan negatif perekonomian global, termasuk perekonomian Indonesia, dapat menimbulkan dampak merugikan yang material terhadap kegiatan usaha, kondisi keuangan, dan kinerja operasi Perseroan.	If the economy continues to be volatile or declining, Indonesia's economic growth and fiscal position, the Rupiah exchange rate and other aspects of the Indonesian economy could be negatively impacted. There can be no assurance that the recent improvement in Indonesia's economic conditions will be sustained. In particular, changes in the regional or global economic environment that cause a loss of investor confidence in emerging market financial systems and other markets, or other factors, could increase the volatility of Indonesia's financial markets, hinder or reverse Indonesia's economic growth or cause a prolonged economic crisis or recession in Indonesia. Any increase in volatility, slowdown, or negative growth of the global economy, including the Indonesian economy, could have a material adverse effect on the Company's business activities, financial condition, and operating performance.
Mitigasi Mitigation	• Monitoring berkelanjutan atas perkembangan industri seluler, menara telekomunikasi dan kondisi ekonomi domestik, regional, dan global. • Memperkuat koordinasi dengan lembaga eksternal yang berkaitan dengan bisnis Mitratel untuk mendapatkan informasi yang memadai dalam mengatasi potensi perubahan makro ekonomi. • Monitoring berkelanjutan pengaruh gejala sosial politik terhadap gangguan operasional. • Memantau pengaruh makro ekonomi terhadap potensi peningkatan beban.	• Continuous monitoring of developments in the cellular industry, telecommunications towers and domestic, regional, and global economic conditions. • Strengthening coordination with external institutions related to Mitratel's business to obtain adequate information to address potential macroeconomic changes. • Continuous monitoring of the influence of socio-political turmoil on operational disruptions. • Monitoring macroeconomic influences on potential increase in expenses.

Risiko yang Dihadapi: Menara telekomunikasi Perseroan mungkin mengalami dampak bencana alam atau kerusakan yang tidak diperkirakan sebelumnya termasuk dampak dari perubahan iklim dan asuransi Perseroan yang mungkin tidak menyediakan perlindungan yang memadai.

Risk to be Faced: The Company's telecommunication towers may be impacted by natural disasters or unforeseen damage including the impact of climate change and the Company's insurance may not provide adequate coverage.

Dampak Impact	Terjadi kerusakan atau kehancuran menara telekomunikasi akibat bencana alam seperti badai, banjir, puting beliung, dan gempa bumi, serta akibat perubahan iklim dapat memengaruhi layanan kepada pelanggan. Kecukupan asuransi gangguan yang dimiliki belum memadai untuk menutup seluruh pendapatan yang hilang, termasuk potensi pendapatan dari penyewa baru yang semestinya dapat ditambahkan ke menara telekomunikasi seandainya kerusakan tersebut tidak terjadi. Hal ini dapat menimbulkan hilangnya pelanggan dan berdampak merugikan terhadap kondisi keuangan, kinerja operasi, dan likuiditas.	Damage or destruction of telecommunication towers due to natural disasters such as storms, floods, tornadoes, and earthquakes, as well as due to climate change, may affect services to customers. The adequacy of our interruption insurance may not be sufficient to cover all lost revenues, including potential revenues from new tenants that could have been added to the telecommunications towers had the damage not occurred. This could result in the loss of customers and adversely affect our financial condition, operating performance, and liquidity.
Mitigasi Mitigation	• Melakukan kolaborasi dalam proses pengadaan dan mendorong para mitra untuk mengimplementasikan perbaikan iklim dan kinerja karbon dalam operasi seperti pemanfaatan material tower non-baja (GFRP). • Efisiensi operasi dengan penerapan <i>renewable energy</i> seperti solar panel system, penggantian <i>Valve Regulated Lead Acid (VRLA)</i>, revitalisasi genset, dan digitalisasi proses. • Mengambil sertifikasi ISO 14001:2015 tentang Sistem Manajemen Lingkungan. • Melaksanakan penilaian ESG Rating oleh eksternal. • Mentransfer risiko menggunakan asuransi pada aset berisiko tinggi untuk mengantisipasi potensi bencana alam.	• Collaborating in the procurement process and encouraging partners to implement climate and carbon performance improvements in operations such as the utilization of non-steel tower materials (GFRP). • Operating efficiency by implementing renewable energy such as solar panel system, Valve Regulated Lead Acid (VRLA) replacement, generator revitalization, and process digitalization. • Taking ISO 14001:2015 certification on Environmental Management System. • Carrying out an external ESG Rating assessment. • Transferring risks using insurance on high-risk assets to anticipate potential natural disasters.

Risiko yang Dihadapi: Perseroan mengandalkan personel manajemen kunci dan ketidakmampuan Perseroan untuk merekrut, melatih, mempertahankan, dan memotivasi karyawan kunci dapat menimbulkan dampak merugikan.
Risk to be Faced: The Company relies on key management personnel and the Company's inability to recruit, train, retain, and motivate key employees could have an adverse impact.

Dampak Impact	Kesulitan dalam merekrut, melatih, mempertahankan, dan memotivasi tenaga terlatih kunci dalam industri menara telekomunikasi, karena kelangkaan tenaga terlatih dan persaingan yang semakin ketat serta adanya kesenjangan terkait pemerataan kesempatan kerja, keselamatan kerja, akses terhadap fasilitas kesehatan, pendidikan, hak asasi manusia, keberagaman dan upah yang adil. Hal ini dapat mengganggu kemampuan untuk melaksanakan strategi bisnisnya dan memengaruhi kondisi keuangan, kinerja operasi, dan likuiditas.	Difficulty in recruiting, training, retaining and motivating key trained personnel in the telecommunications tower industry, due to the scarcity of trained personnel and intensified competition and gaps related to equal employment opportunities, occupational safety, access to health facilities, education, human rights, diversity and fair wages. This could impair its ability to execute its business strategy and affect its financial condition, operating performance, and liquidity.
Mitigasi Mitigation	- Melakukan pengembangan kompetensi sumber daya manusia secara berkelanjutan dengan program beasiswa, pelatihan, dan sertifikasi untuk mendukung strategi bisnis dan operasional. - Monitoring dan analisa berkelanjutan terkait <i>talent pool</i>. - Mengimplementasikan kebijakan <i>human capital</i> seperti, anti-penyuapan, anti-diskriminasi, keberagaman, dan keselamatan dan kesehatan (K3). - Monitoring kepuasan karyawan melalui penilaian indeks kepuasan pegawai, pelaksanaan survei dan <i>feedback</i>. - Mengambil sertifikasi ISO 9001:2015, ISO 45001:2018, ISO 31000:2018, dan ISO 37001:2016. - Menawarkan keuntungan dan jenjang karier yang jelas serta program persiapan pensiun.	- Conducting sustainable human resource competency development with scholarship, training, and certification programs to support business and operational strategies. - Continuous monitoring and analysis of the talent pool. - Implementing human capital policies such as anti-bribery, anti-discrimination, diversity, and safety and health (K3). - Monitoring employee satisfaction through employee satisfaction index assessment, survey implementation and feedback. - Taking ISO 9001:2015, ISO 45001:2018, ISO 31000:2018, and ISO 37001:2016 certifications. - Offering benefits and clear career paths as well as retirement preparation programs.

Risiko yang Dihadapi: Ketidakmampuan Perseroan untuk mendapatkan pembiayaan dengan ketentuan yang wajar.
Risk to be Faced: The Company's inability to obtain financing on reasonable terms.

Dampak Impact	Kemampuan Perseroan untuk mendapatkan pembiayaan dengan ketentuan yang wajar secara komersial akan bergantung pada beberapa faktor, termasuk kondisi keuangan Perseroan, kinerja operasional dan arus kas operasi untuk memenuhi pembayaran pokok dan bunga, kondisi industri penyewaan menara telekomunikasi, serta kondisi ekonomi, politik, dan kondisi lainnya di Indonesia. Apabila Perseroan tidak mampu untuk mendapatkan pembiayaan tersebut, rencana pengembangan Perseroan, termasuk beberapa rencana akuisisi, mungkin tidak dapat dijalankan sesuai rencana, dan prospeknya dapat sangat terpengaruh. Selain itu Perjanjian pembiayaan mengandung beberapa pembatasan dan restriksi yang dapat membatasi kemampuan Perseroan, dan tidak dapat memastikan bahwa Perseroan dapat bernegosiasi dengan para Bank untuk melakukan <i>rollover</i> atau <i>refinance</i> utang yang saat ini dimiliki atau mendapatkan kredit yang cukup, yang dapat memunculkan kendala likuiditas untuk Perseroan dan mengakibatkan dibutuhkan sumber pendanaan alternatif lainnya.	The Company's ability to obtain financing on commercially reasonable terms will depend on several factors, including the Company's financial condition, operating performance, and operating cash flows to meet principal and interest payments, the condition of the telecommunications tower leasing industry, as well as economic, political and other conditions in Indonesia. If the Company is unable to obtain such financing, the Company's development plans, including some acquisition plans, may not be able to be carried out as planned, and its prospects may be seriously affected. In addition, the financing agreement contains several restrictions and limitations that may limit the Company's ability, and there can be no assurance that the Company will be able to negotiate with the Banks to rollover or refinance its existing debt or obtain sufficient credit, which may create liquidity constraints for the Company and result in the need for other alternative sources of funding.
Mitigasi Mitigation	- Monitoring berkelanjutan atas pemenuhan rasio utama Perseroan. - Mencari dan mengkaji berbagai alternatif pembiayaan. - Memaksimalkan hubungan baik yang sudah lama terjalin dengan bank.	- Continuous monitoring of the fulfillment of the Company's key ratios. - Seeking and reviewing various financing alternatives. - Maximizing long-standing good relations with banks.

Risiko yang Dihadapi: Utang jangka panjang Perseroan dapat memengaruhi bisnis, prospek, hasil usaha, dan kondisi keuangan Perseroan.
Risk to be Faced: The Company's long-term debt may affect its business, prospects, results of operations and financial condition.

Dampak Impact	Perjanjian pembiayaan Perseroan memungkinkan akses utang tambahan, namun dengan batasan dan risiko. Sebagian besar arus kas harus dialokasikan untuk pembayaran utang, mengurangi dana untuk kebutuhan lain. Perjanjian ini juga dapat membatasi kemampuan Perseroan memperoleh pendanaan tambahan untuk akuisisi atau proyek baru. Risiko lainnya termasuk kerentanan terhadap pelemahan ekonomi, posisi kompetitif yang lebih lemah, serta pembatasan pembayaran dividen. Jika arus kas tidak cukup untuk memenuhi kewajiban keuangan, dapat terjadi gagal bayar yang merugikan, sehingga berdampak pada bisnis dan kondisi keuangan Perseroan.	The Company's financing agreements allow access to additional debt, but with restrictions and risks. A significant portion of cash flow must be allocated to debt repayment, reducing funds for other needs. These covenants may also limit the Company's ability to obtain additional funding for acquisitions or new projects. Other risks include vulnerability to economic downturn, a weaker competitive position, as well as restrictions on dividend payments. If cash flows are insufficient to meet financial obligations, an adverse default could occur, impacting the Company's business and financial condition.

Mitigasi Mitigation	- Monitoring berkelanjutan atas pemenuhan rasio utama Perseroan. - Mencari dan mengkaji berbagai alternatif pembiayaan. - Memaksimalkan hubungan baik yang sudah lama terjalin dengan bank.	- Continuous monitoring of the fulfillment of the Company's key ratios. - Seeking and reviewing various financing alternatives. - Maximizing long-standing good relations with banks.

Risiko yang Dihadapi: Liputan media yang tidak menguntungkan.
Risk to be Faced: Unfavorable media coverage.

Dampak Impact	Publisitas yang tidak menguntungkan bagi Perseroan dapat memengaruhi reputasi Perseroan dan kemampuan Perseroan untuk dapat mendapatkan bisnis baru. Selain itu, apabila berdampak pada persepsi publik terhadap Grup Telkom secara umum atau afliasinya, mengetahui hubungan Perseroan dengan Grup Telkom, dapat berdampak bagi Perseroan, meskipun kejadian tersebut tidak secara langsung melibatkan Perseroan. Publisitas negatif termasuk namun tidak terbatas pada opini, asumsi, atau berita yang belum dikonfirmasi oleh Grup Telkom, dapat memunculkan regulasi dan pengawasan legislatif baru, atau meningkatkan biaya Perseroan dalam menjalankan bisnis. Hal-hal tersebut dapat memiliki dampak material terhadap bisnis, kondisi keuangan, hasil usaha, dan valuasi saham penawaran Perseroan.	Unfavorable publicity for the Company may affect the Company's reputation and its ability to secure new business. In addition, if it impacts the public perception of the Telkom Group in general or its affiliates, knowing the Company's relationship with the Telkom Group, it may impact the Company, even if the incident does not directly involve the Company. Negative publicity including but not limited to unconfirmed opinions, assumptions, or news by Telkom Group, may lead to new legislative regulations and oversight, or increase the Company's costs of doing business. Such matters may have a material impact on the Company's business, financial condition, results of operations and the valuation of its common stock.
Mitigasi Mitigation	- Monitoring berkala dan media <i>mapping</i> guna melakukan antisipasi atas kemungkinan terjadi pemberitaan negatif terhadap Perseroan. - Melakukan program pemberitaan positif secara berkala.	- Periodic monitoring and media mapping to anticipate the possibility of negative news about the Company. - Conducting positive news programs on a regular basis.

Hasil pemantauan risiko dilaporkan oleh Unit Manajemen Risiko kepada Direksi dan Dewan Komisaris secara berkala setiap triwulan.

Basis for opinion

We conducted our audit in accordance with Standards on Auditing established by the Indonesian Institute of Certified Public Accountants ("IICPA"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements paragraph of our report. We are independent of the Group in accordance with the ethical requirements relevant to our audit of the consolidated financial statements in Indonesia, and we have fulfilled our other ethical responsibilities in accordance with such requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matter

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. Such key audit matters were addressed in the context of our audit of the consolidated financial statements taken as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on such key audit matters. For the key audit matter below, our description of how our audit addressed such key audit matter is provided in such context.

We have fulfilled the responsibilities described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements paragraph of our report, including in relation to the key audit matter communicated below. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the key audit matter below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

Pengakuan pendapatan

Revenue recognition

Penjelasan atas hal audit utama:

Description of the key audit matter:

Pendapatan Grup untuk tahun yang berakhir pada tanggal 31 Desember 2024 sebesar Rp9,3 triliun, terutama berasal dari penghasilan sewa atas menara telekomunikasi dan jasa jaringannya sebesar Rp8,7 triliun. Pendapatan sewa dari pelanggan diakui sebagai pendapatan secara sistematis dengan dasar garis lurus selama jangka waktu sewa yang mencerminkan pola manfaat dari aset pendasar yang menurun. Pemenuhan kewajiban pelaksanaan untuk jasa tersebut mungkin dilakukan cukup lama sebelum penerbitan faktur kepada pelanggan, sehingga terdapat risiko pendapatan dicatat dengan dokumen pendukung yang belum sepenuhnya memadai.

The Group's revenue amounting to Rp9.3 trillion for the year ended December 31, 2024, was primarily comprises lease income of its telecommunication towers and network services amounting to Rp8.7 trillion. Lease revenues from customers are recognized systematically as revenue on a straight-line basis over the lease term reflecting pattern in which the benefit of the underlying assets diminished. The satisfaction of the performance obligation for these services may took place considerably earlier than the issuance of invoices to the customers, which poses a risk of recognizing revenue based on incomplete supporting documentation.

Pendapatan merupakan ukuran penting yang digunakan untuk mengevaluasi kinerja Grup dan merupakan faktor utama yang mendorong profitabilitas. Pendapatan dapat diakui secara tidak tepat untuk meningkatkan hasil usaha dan mencapai pertumbuhan pendapatan sejalan dengan tujuan Grup, sehingga meningkatkan risiko kesalahan penyajian material. Karena signifikansi keuangannya, kesalahan penyajian atas pendapatan dapat memiliki dampak substansial pada laporan keuangan konsolidasian secara keseluruhan dan keputusan yang dibuat oleh para pemangku kepentingan. Oleh karena itu, pengakuan pendapatan merupakan hal audit utama bagi kami. Catatan 2 dan 30 pada laporan keuangan konsolidasian terlampir menyajikan pengungkapan atas pendapatan Grup.

Revenue is an important measure used to evaluate the performance of the Group and is the main driver of profitability. Revenue may be inappropriately recognized to improve business results and achieve revenue growth in line with the objectives of the Group, thus increasing the risk of material misstatement. Due to its financial significance, misstatement in revenue can have a substantial impact on the overall consolidated financial statements and the decisions made by stakeholders. Accordingly, revenue recognition is determined as a key audit matter. Notes 2 and 30 to the accompanying consolidated financial statements provide the relevant disclosures on the Group's revenue.

Respons audit:

Audit response:

Kami mengevaluasi dan menguji rancangan dan efektivitas kendali utama atas proses pendapatan. Atas dasar sampel, kami melakukan pengujian rinci pisah batas transaksi menjelang dan setelah tanggal 31 Desember 2024 untuk memastikan bahwa pendapatan dicatat pada periode yang sesuai. Atas dasar sampel, kami melakukan pengujian rinci atas pengakuan penghasilan sewa ke dokumen pendukung utama untuk memastikan keterjadian atas pendapatan serta telah diakui sesuai dengan standar akuntansi yang berlaku dan dicatat pada jumlah dan periode yang tepat. Kami juga mengirim konfirmasi kepada pelanggan atas dasar sampel untuk syarat-syarat tertentu pemenuhan kewajiban pelaksanaan atas jasa yang belum ditagih pada tanggal 31 Desember 2024 sebagai dasar pengakuan penghasilan sewa.

We evaluated and assessed the design and operating effectiveness of the key controls over the revenue process. On sample basis, we performed detailed cut-off testing of the transactions occurring near and after the year-end December 31, 2024 to ensure that such transactions were recorded in the proper period. On sample basis, we performed test of details of the lease income to supporting documentation to ensure the occurrence of the revenue and whether it has been recognized in accordance with the applicable accounting standards and recorded in the proper amount and period. We also sent confirmations to customers on a sample basis to confirm specific terms of satisfaction of performance obligation for unbilled services as of December 31, 2024 as the basis for lease income recognition.

Kami juga melakukan pengujian rinci dengan menentukan akun buku besar yang digunakan untuk mencatat entri antara pendapatan, piutang usaha beserta liabilitas kontrak, dan kas dan bank, serta menggunakan korelasi (pencatatan entri jurnal) antara akun-akun tersebut untuk melakukan kembali (*reperform*) pencatatan entri jurnal. Kami melengkapi prosedur ini dengan pengujian informasi yang dihasilkan oleh Grup atas entri jurnal kas untuk memastikan bahwa kas tersebut adalah kas sebenarnya yang berasal dari pelanggan. Kami juga mengevaluasi kelayakan dan kecukupan penyajian dan pengungkapan yang relevan atas pendapatan atas kontrak dengan pelanggan dalam laporan keuangan konsolidasian terlampir.

We also performed test of details by identifying which general ledger accounts are used to post entries among revenue, trade receivables along with contract liabilities, and cash and banks and use the correlation (journal entry postings) among those accounts to reperform the posting of journal entries. We supplemented this procedure with testing of the information produced by the Group over cash journal entries to ensure they are real cash from customers. Moreover, we evaluated the appropriateness and adequacy of the presentation and the relevant disclosures regarding revenue from contracts with customers in the accompanying consolidated financial statements.

Tanggung jawab auditor terhadap audit atas laporan keuangan konsolidasian

Tujuan kami adalah untuk memperoleh keyakinan memadai tentang apakah laporan keuangan konsolidasian secara keseluruhan bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan, dan untuk menerbitkan laporan auditor independen yang mencakup opini kami. Keyakinan memadai merupakan suatu tingkat keyakinan tinggi, namun bukan merupakan suatu jaminan bahwa audit yang dilaksanakan berdasarkan Standar Audit yang ditetapkan oleh IAPI akan selalu mendeteksi kesalahan penyajian material ketika hal tersebut ada. Kesalahan penyajian dapat disebabkan oleh kecurangan maupun kesalahan dan dianggap material jika, baik secara individual maupun agregat, dapat diekspektasikan secara wajar akan memengaruhi keputusan ekonomi yang diambil oleh pengguna berdasarkan laporan keuangan konsolidasian tersebut.

Sebagai bagian dari suatu audit berdasarkan Standar Audit yang ditetapkan oleh IAPI, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga:

- Mengidentifikasi dan menilai risiko kesalahan penyajian material dalam laporan keuangan konsolidasian, baik yang disebabkan oleh kecurangan maupun kesalahan, mendesain dan melaksanakan prosedur audit yang responsif terhadap risiko tersebut, serta memperoleh bukti audit yang cukup dan tepat untuk menyediakan basis bagi opini kami. Risiko tidak terdeteksinya suatu kesalahan penyajian material yang disebabkan oleh kecurangan lebih tinggi dari yang disebabkan oleh kesalahan, karena kecurangan dapat melibatkan kolusi, pemalsuan, penghilangan secara sengaja, pernyataan salah, atau pengabaian atas pengendalian internal.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements taken as a whole are free from material misstatement, whether due to fraud or error, and to issue an independent auditor's report that includes our audit opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing established by the IICPA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of such consolidated financial statements.

As part of an audit in accordance with Standards on Auditing established by the IICPA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- *Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to such risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our audit opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or override of internal control.*

- Memeroleh suatu pemahaman tentang pengendalian internal yang relevan dengan audit untuk mendesain prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektifitasan pengendalian internal Grup.
- Mengevaluasi ketepatan kebijakan akuntansi yang digunakan serta kewajaran estimasi akuntansi dan pengungkapan terkait yang dibuat oleh manajemen.
- Menyimpulkan ketepatan penggunaan basis akuntansi kelangsungan usaha oleh manajemen dan, berdasarkan bukti audit yang diperoleh, apakah terdapat suatu ketidakpastian material yang terkait dengan peristiwa atau kondisi yang dapat menyebabkan keraguan signifikan atas kemampuan Grup untuk mempertahankan kelangsungan usahanya. Ketika kami menyimpulkan bahwa terdapat suatu ketidakpastian material, kami diharuskan untuk menarik perhatian dalam laporan auditor independen kami ke pengungkapan terkait dalam laporan keuangan konsolidasian atau, jika pengungkapan tersebut tidak memadai, memodifikasi opini kami. Kesimpulan kami didasarkan pada bukti audit yang diperoleh hingga tanggal laporan auditor independen kami. Namun, peristiwa atau kondisi masa depan dapat menyebabkan Grup tidak dapat mempertahankan kelangsungan usahanya.

- *Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.*
- *Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our independent auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusion is based on the audit evidence obtained up to the date of our independent auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.*

Amandemen PSAK 201: Liabilitas Jangka Panjang dengan Kovenan

Amendment of PSAK 201: Non-current Liabilities with Covenants

Amandemen ini menentukan persyaratan untuk mengklasifikasikan suatu liabilitas sebagai jangka pendek atau jangka panjang dan menjelaskan:

The amendments specify the requirements for classifying liabilities as current or non-current and clarify:

- hal yang dimaksud sebagai hak untuk menanggguhkan pelunasan,
- hak untuk menanggguhkan pelunasan harus ada pada akhir periode pelaporan,
- klasifikasi tersebut tidak dipengaruhi oleh kemungkinan entitas akan menggunakan haknya untuk menanggguhkan liabilitas, dan
- bahwa jika derivatif melekat dalam kewajiban yang dapat dikonversi dianggap sebagai instrumen ekuitas, ketentuan kewajiban ini tidak akan mempengaruhi klasifikasinya sebagai lancar atau tidak lancar

- what is meant by a right to defer settlement,
- the right to defer must exist at the end of the reporting period,
- classification is not affected by the likelihood that an entity will exercise its deferral right, and
- That if an embedded derivative in a convertible liability is considered as an equity instrument, the terms of the liability would not affect its classification as current or non-current

Selain itu, persyaratan telah diperkenalkan untuk mewajibkan pengungkapan ketika suatu kewajiban timbul dari pinjaman diklasifikasikan sebagai tidak lancar dan hak entitas untuk menunda penyelesaian bergantung pada kepatuhan terhadap persyaratan di masa depan dalam waktu dua belas bulan.

In addition, a requirement has been introduced to require disclosure when a liability arising from a loan agreement is classified as non-current and the entity's right to defer settlement is contingent on compliance with future covenants within twelve months.

Amandemen ini tidak diharapkan akan memberikan dampak terhadap laporan keuangan konsolidasian Grup.

The amendments are not expected to have an impact on the Group's consolidated financial statements.

Grup menentukan bahwa mereka telah mengakuisisi bisnis ketika rangkaian aktivitas dan aset yang diakuisisi mencakup input dan proses substantif yang bersama-sama secara signifikan berkontribusi pada kemampuan untuk menghasilkan output. Ketika melakukan akuisisi atas sebuah bisnis, Grup mengklasifikasikan dan menentukan aset keuangan yang diperoleh dan liabilitas keuangan yang diambil alih berdasarkan pada persyaratan kontraktual, kondisi ekonomi dan kondisi terkait lain yang ada pada tanggal akuisisi.

Dalam suatu kombinasi bisnis yang dilakukan secara bertahap, Grup mengukur kembali kepentingan ekuitas yang dimiliki sebelumnya pada pihak yang diakuisisi pada nilai wajar tanggal akuisisi dan mengakui keuntungan atau kerugian yang dihasilkan.

Setiap imbalan kontinjensi yang akan ditransfer oleh perseroan pengakuisisi akan diakui pada nilai wajar pada tanggal akuisisi. Imbalan kontinjensi yang diklasifikasikan sebagai ekuitas tidak diukur kembali dan penyelesaian selanjutnya adalah diperhitungkan dalam ekuitas.

Jika imbalan tersebut lebih rendah dari nilai wajar aset neto entitas anak yang diakuisisi, selisih tersebut diakui pada laba rugi sebagai keuntungan dari pembelian dengan diskon setelah sebelumnya manajemen melakukan penilaian atas identifikasi dan nilai wajar dari aset yang diperoleh dan liabilitas yang diambil alih.

Setelah pengakuan awal, *goodwill* diukur pada jumlah tercatat dikurangi akumulasi kerugian penurunan nilai. At acquisition date, goodwill is initially measured at cost being the excess of the aggregate of the consideration transferred and the amount recognized for NCI over the net identifiable assets acquired and liabilities assumed.

If this consideration is lower than the fair value of the net assets of the subsidiary acquired, the difference is recognized in profit or loss as gain on bargain purchase after previously assessing the identification and fair value measurement of the acquired assets and the assumed liabilities.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's Cash-generating Units ("CGU") that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are allocated to those CGUs.

Where goodwill forms part of a CGU and part of the operations within that CGU is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the CGU retained.

Business Combinations of Entities Under Common Control

Based on PSAK 338, "Business Combinations of Entities Under Common Control", Business combinations under common control are accounted for using the pooling-of-interests method, whereby the difference between the considerations transferred and the book value of the net assets of the acquiree is recognized as part of "Additional Paid-in Capital" account in the consolidated statement of financial position.

In applying the said pooling-of-interest method, the components of the financial statements of the combining entities are presented as if the combination has occurred since the beginning of the period of the combining entity become under common control.

The difference between the consideration paid or received and the historical book value relating to the carrying value of the interest acquired, after taking into account the effects of income tax, is recognized directly in equity and presented as "Additional Paid-in Capital" in the equity section of the consolidated financial statements.

At the initial application of PSAK 338, the entire balance of the Difference in Value from Restructuring Transactions of Entities Under Common Control is reclassified to the "Additional Paid-in Capital" account in the consolidated statements of financial position.

i. Instrumen Keuangan

Grup mengklasifikasikan instrumen keuangan ke dalam aset keuangan dan liabilitas keuangan. Instrumen keuangan adalah setiap kontrak yang menimbulkan aset keuangan dari satu entitas dan liabilitas keuangan atau instrumen ekuitas dari entitas lain.

Aset Keuangan

Pengakuan dan Pengukuran Awal

Pada pengakuan awal, Grup mengukur aset keuangan pada nilai wajarnya ditambah biaya transaksi, dalam hal aset keuangan tidak diukur pada nilai wajar melalui laba rugi ("NWLR"). Piutang usaha yang tidak mengandung komponen pembiayaan yang signifikan, dimana Grup telah menerapkan cara praktis, yaitu diukur pada harga transaksi yang ditentukan sesuai PSAK 115: Pendapatan dari kontrak dengan pelanggan, seperti diungkapkan pada Catatan 2r.

Agar aset keuangan diklasifikasikan dan diukur pada biaya perolehan diamortisasi atau NWPKL, aset keuangan harus menghasilkan arus kas yang semata dari pembayaran pokok dan bunga ("SPPB") dari jumlah pokok terutang. Penilaian ini disebut sebagai uji SPPB dan dilakukan pada tingkat instrumen.

Model bisnis Grup untuk mengelola aset keuangan mengacu pada bagaimana Grup mengelola aset keuangannya untuk menghasilkan arus kas. Model bisnis menentukan apakah arus kas akan dihasilkan dari pengumpulan arus kas kontraktual, penjualan aset keuangan, atau keduanya.

**2 SUMMARY OF MATERIAL ACCOUNTING
POLICIES (continued)**

i. Financial Instruments

The Group classifies financial instruments into financial assets and financial liabilities. A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial Assets

Initial Recognition and Measurement

At initial recognition, the Group measures a financial asset at its fair value plus transaction costs, in the case of a financial asset not at fair value through profit or loss ("FVTPL"). Trade receivables that do not contain a significant financing component, for which the Group has applied the practical expedient are measured at the transaction price determined under PSAK 115: Revenue from contracts with customers, as disclosed in Note 2r.

In order for a financial asset to be classified and measured at amortized cost or FVOCI, it needs to give rise to cash flows that are 'solely payments of principal and interest ("SPPI")' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level.

The Group's business model for managing financial assets refers to how the Group manages its financial assets to generate cash flow. The business model determines whether cash flows will result from the contractual collection of cash flows, the sale of a financial asset, or both.

Pengukuran Selanjutnya

Untuk tujuan pengukuran selanjutnya, aset keuangan diklasifikasikan dalam empat kategori:

- Aset keuangan pada biaya perolehan diamortisasi (instrumen utang)
- Aset keuangan pada nilai wajar melalui OCI dengan daur ulang keuntungan dan kerugian kumulatif (instrumen utang)
- Aset keuangan yang ditetapkan pada nilai wajar melalui OCI tanpa daur ulang keuntungan dan kerugian kumulatif setelah penghentian pengakuan (instrumen ekuitas)
- Aset keuangan pada nilai wajar melalui laba rugi.

Pengukuran selanjutnya dari aset keuangan tergantung kepada klasifikasi masing-masing aset keuangan seperti berikut ini:

Aset Keuangan pada Biaya Perolehan Diamortisasi (Instrumen Utang)

Kategori ini adalah yang paling relevan dengan Grup. Grup mengukur aset keuangan yang diukur dengan biaya perolehan diamortisasi jika kedua kondisi berikut terpenuhi:

- Aset keuangan dimiliki dalam model bisnis dengan tujuan untuk memiliki aset keuangan untuk mengumpulkan arus kas kontraktual; dan
- Persyaratan kontraktual dari aset keuangan menimbulkan arus kas pada tanggal tertentu yang hanya merupakan pembayaran pokok dan bunga dari jumlah pokok terutang.

Subsequent Measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortized cost (debt instruments)
- Financial assets at fair value through OCI with recycling of cumulative gains and losses (debt instruments)
- Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon derecognition (equity instruments)
- Financial assets at fair value through profit or loss.

The subsequent measurement of financial assets depends on their classification as described below:

Financial Assets at Amortized Cost (Debt Instruments)

This category is the most relevant to the Group. The Group measures financial assets at amortized cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Kategori ini termasuk instrumen derivatif dan investasi ekuitas yang diperdagangkan di bursa efek yang mana oleh Grup diklasifikasikan secara takterbatalkan pada NWPKL. **Kerugian Kredit yang Diekspektasi
("KKE")**

Grup mengakui penyisihan KKE untuk semua instrumen utang yang bukan diukur pada NWLR. KKE ditentukan atas perbedaan antara arus kas kontraktual menurut kontrak dan semua arus kas yang diharapkan akan diterima oleh Grup, yang didiskontokan dengan perkiraan SBE orisinal. Arus kas yang diharapkan mencakup setiap arus kas dari penjualan agunan yang dimiliki atau perbaikan kredit lainnya yang merupakan bagian yang tidak terpisahkan dalam ketentuan kontrak.

Karena piutang usaha dan piutang lain-lainnya tidak memiliki komponen pembiayaan signifikan, Grup menerapkan pendekatan yang disederhanakan dalam perhitungan KKE. Oleh karena itu, Grup tidak menelusuri perubahan dalam risiko kredit, namun justru mengakui penyisihan kerugian berdasarkan KKE sepanjang umurnya pada setiap tanggal pelaporan. Grup membentuk matriks provisi berdasarkan pengalaman kerugian kredit masa lampau, disesuaikan dengan perkiraan masa depan (*forward-looking*) atas faktor yang spesifik untuk debitur dan lingkungan ekonomi.

Untuk instrumen utang pada NWPKL, Grup menerapkan penyederhanaan sehubungan dengan risiko kredit rendah. Setiap tanggal pelaporan, Grup mengevaluasi apakah instrumen utang tersebut dianggap memiliki risiko kredit rendah dengan menggunakan semua informasi yang wajar dan didukung yang tersedia tanpa biaya atau usaha yang berlebihan. Dalam melakukan evaluasi tersebut, Grup menilai kembali peringkat kredit internal dari instrumen utang tersebut. Selain itu, Grup mempertimbangkan bahwa telah terjadi peningkatan risiko kredit secara signifikan ketika pembayaran kontraktual lebih dari 90 hari dari tanggal jatuh tempo.

**2 SUMMARY OF MATERIAL ACCOUNTING
POLICIES (continued)**

i. Financial Instruments (continued)

Impairment of Financial Assets

Expected Credit Losses ("ECL")

The Group recognizes an allowance for ECL for all debt instruments not held at FVTPL. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original EIR. The expected cash flows include any cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

Because its trade and other receivables do not contain significant financing component, the Group applies a simplified approach in calculating ECL. Therefore, the Group does not track changes in credit risk, but instead recognizes a loss allowance based on lifetime ECL at each reporting date. The Group established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

For debt instruments at FVOCI, the Group applies the low credit risk simplification. At every reporting date, the Group evaluates whether the debt instrument is considered to have low credit risk using all reasonable and supportable information that is available without undue cost or effort. In making that evaluation, the Group reassesses the internal credit rating of the debt instrument. In addition, the Group considers that there has been a significant increase in credit risk when contractual payments are more than 90 days past due.

Instrumen utang Grup pada NWPKL hanya terdiri dari obligasi kuotasi yang dinilai dalam kategori investasi teratas (Sangat Baik dan Baik) oleh *the Good Credit Rating Agency/Lembaga Pemeringkat Kredit* dan, oleh karena itu, dianggap sebagai investasi dengan risiko kredit rendah. Merupakan kebijakan Grup untuk mengukur KKE pada instrumen tersebut setiap 12 bulan. Namun, jika terjadi peningkatan risiko kredit secara signifikan sejak diterbitkan, penyisihan akan didasarkan pada KKE sepanjang umurnya. Grup menggunakan peringkat dari *the Good Credit Rating Agency/Lembaga Pemeringkat Kredit* baik untuk menentukan apakah risiko kredit dalam instrumen utang telah meningkat secara signifikan dan juga untuk mengestimasi KKE.

Grup menganggap aset keuangan dalam gagal bayar ketika pembayaran kontraktual telah lewat 90 hari dari tanggal jatuh tempo. Namun, dalam kasus tertentu, Grup juga dapat mempertimbangkan aset keuangan menjadi gagal bayar ketika informasi internal atau eksternal menunjukkan bahwa besar kemungkinan Grup tidak menerima jumlah kontraktual terutang secara penuh sebelum memperhitungkan perbaikan kredit yang dimiliki oleh Grup. Aset keuangan dihapuskan jika tidak terdapat ekspektasi yang wajar untuk memulihkan arus kas kontraktual.

The Group's debt instruments at FVOCI comprise solely of quoted bonds that are graded in the top investment category (Very Good and Good) by the Good Credit Rating Agency and, therefore, are considered to be low credit risk investments. It is the Group's policy to measure ECLs on such instruments on a 12-month basis. However, when there has been a significant increase in credit risk since origination, the allowance will be based on the lifetime ECL. The Group uses the ratings from the Good Credit Rating Agency both to determine whether the debt instrument has significantly increased in credit risk and to estimate ECLs.

The Group considers a financial asset in default when contractual payments are 90 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

Penghentian Pengakuan

Aset keuangan (atau, jika berlaku, bagian dari aset keuangan atau bagian dari kelompok aset keuangan serupa) terutama dihentikan pengakuannya (yaitu, dihapus dari laporan posisi keuangan konsolidasian Grup) ketika:

- Hak untuk menerima arus kas dari aset telah kedaluwarsa; Atau
- Grup telah mengalihkan haknya untuk menerima arus kas dari aset atau telah mengasumsikan kewajiban untuk membayar arus kas yang diterima secara penuh tanpa penundaan material kepada pihak ketiga berdasarkan pengaturan 'pass-through'; dan salah satu (a) Grup telah mengalihkan secara substansial semua risiko dan manfaat aset, atau (b) Grup tidak mengalihkan atau memiliki secara substansial seluruh risiko dan manfaat aset, tetapi telah mengalihkan pengendalian aset.

Ketika Grup telah mengalihkan haknya untuk menerima arus kas dari aset atau telah menandatangani perjanjian *pass-through*, Grup mengevaluasi apakah, dan sejauh mana, telah mempertahankan risiko dan manfaat kepemilikan. Ketika Grup tidak mengalihkan atau mempertahankan secara substansial seluruh risiko dan manfaat dari aset, atau mengalihkan pengendalian atas aset, Grup terus mengakui aset yang ditransfer tersebut sejauh keterlibatannya secara berkelanjutan. Dalam kasus tersebut, Grup juga mengakui liabilitas terkait. Aset alihan dan liabilitas terkait diukur atas dasar yang mencerminkan hak dan kewajiban yang dimiliki Grup.

Keterlibatan berkelanjutan dalam bentuk jaminan atas aset yang ditransfer, diukur pada nilai yang lebih rendah antara jumlah tercatat awal aset dan jumlah maksimum imbalan yang dibutuhkan oleh Grup untuk membayar kembali.

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognized (i.e., removed from the Group's consolidated statement of financial position) when:

- The rights to receive cash flows from the asset have expired; Or
- The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognize the transferred asset to the extent of its continuing involvement. In that case, the Group also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

At the reporting dates, accrued interest is recorded separately from the associated borrowings within the current liabilities section. Gains and losses are recognized in the profit or loss when the liabilities are derecognized as well as through the EIR amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in finance costs in the profit or loss.

ii) Payables and Accruals

Liabilities for current trade and other accounts payable, accrued expenses and short-term employee benefit liability are stated at carrying amounts (notional amounts), which approximate their fair values.

Penyusutan aset dimulai pada saat aset tersebut siap untuk digunakan sesuai maksud penggunaannya oleh Grup dan dihitung dengan menggunakan metode garis lurus berdasarkan estimasi masa manfaat ekonomis.

Subsequent to initial recognition, fixed assets, except for land, are carried at cost less any subsequent accumulated depreciation and impairment losses. Depreciation of an asset is commenced when the asset is available for use in the manner intended by the Group and is computed using the straight-line method based on the estimated useful lives of the assets.

Metode penyusutan, umur manfaat dan nilai residu dari suatu aset direviu paling tidak setiap akhir tahun buku dan disesuaikan jika diperlukan. Nilai residu dari aset adalah estimasi jumlah yang dapat diperoleh Grup dari pelepasan aset, setelah dikurangi estimasi biaya pelepasan, ketika aset telah mencapai umur dan kondisi yang diharapkan pada akhir umur manfaatnya.

The depreciation method, useful life and residual value of an asset are reviewed at least at the end of each financial year and adjusted if necessary. The residual value of an asset is the estimated amount that the Group would obtain from disposal of the asset, after deducting the estimated cost of disposal, when the asset has reached the expected life and condition at the end of its useful life.

Estimasi masa manfaat untuk aset yang disusutkan adalah sebagai berikut:

The estimated useful lives for depreciated assets are as follows:

Golongan	Masa manfaat (tahun)/ Useful life (years)	Persentase/ Percentage	Classification
Bangunan	15 - 40	6.67% - 2.50%	Buildings
Peralatan dan instalasi transmisi	40	2.50%	Transmission equipment and installations

Intangible assets except goodwill are amortized using the straight-line method, based on the estimated useful lives of the intangible assets for 3 to 20 years. Intangible assets are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognized in the statement of profit or loss in the expense category that is consistent with the function of the intangible assets.

Aset tidak berwujud dihentikan pengakuannya pada saat pelepasan (yaitu, pada tanggal penerima memperoleh kendali) atau ketika tidak ada manfaat ekonomi masa depan yang diharapkan dari penggunaan atau pelepasannya. o. Penurunan Nilai Aset Non-Keuangan

Pada setiap tanggal pelaporan, Grup menilai apakah terdapat indikasi suatu aset mengalami penurunan nilai. Jika terdapat indikasi tersebut atau pada saat pengujian penurunan nilai aset (yaitu aset takberwujud dengan umur manfaat tidak terbatas, aset takberwujud yang belum dapat digunakan, atau goodwill yang diperoleh dalam suatu kombinasi bisnis) diperlukan, maka Grup membuat estimasi formal jumlah terpulihkan aset tersebut.

Jumlah terpulihkan yang ditentukan untuk aset individual adalah jumlah yang lebih tinggi antara nilai wajar aset atau UPK dikurangi biaya untuk menjual dengan nilai pakainya, kecuali aset tersebut tidak menghasilkan arus kas masuk yang sebagian besar independen dari aset atau kelompok aset lain. Jika nilai tercatat aset atau UPK lebih besar daripada jumlah terpulihkannya, maka aset tersebut dipertimbangkan mengalami penurunan nilai dan nilai tercatat aset diturunkan menjadi sebesar jumlah terpulihkannya.

**2 SUMMARY OF MATERIAL ACCOUNTING

o. Impairment of Non-Financial Assets

The Group assesses at the each reporting date whether there is an indication that an asset may be impaired. If any such indication exists or when annual impairment testing for an asset (i.e. an intangible asset with an indefinite useful life, an intangible asset not yet available for use, or goodwill acquired in a business combination) is required, the Group makes an estimate of the asset's recoverable amount.

An asset's recoverable amount is the higher of an asset's or CGU's fair value less costs to sell and its value in use, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

Dalam menghitung nilai pakai, estimasi arus kas masa depan neto didiskontokan ke nilai kini dengan menggunakan tingkat diskonto sebelum pajak yang menggambarkan penilaian pasar kini dari nilai waktu uang dan risiko spesifik atas aset. Dalam menentukan nilai wajar dikurangi biaya untuk menjual, digunakan harga penawaran pasar terakhir. Jika tidak terdapat transaksi tersebut, Grup menggunakan model penilaian yang sesuai. Perhitungan ini dikuatkan dengan kelipatan penilaian, mengutip harga saham untuk perseroan publik atau indikator nilai wajar lainnya yang tersedia.

Kerugian penurunan nilai dari operasi yang berkelanjutan, jika ada, diakui pada laba rugi sesuai dengan kategori biaya yang konsisten dengan fungsi dari aset yang diturunkan nilainya.

Untuk aset selain *goodwill*, penilaian dilakukan pada akhir setiap tanggal pelaporan apakah terdapat indikasi bahwa rugi penurunan nilai yang telah diakui dalam tahun sebelumnya mungkin tidak ada lagi atau mungkin telah menurun. Jika indikasi dimaksud ditemukan, maka Grup mengestimasi jumlah terpulihkan aset atau UPK tersebut. Kerugian penurunan nilai yang telah diakui dalam tahun sebelumnya untuk aset selain *goodwill* dibalik hanya jika terdapat perubahan asumsi-asumsi yang digunakan untuk menentukan jumlah terpulihkan aset tersebut sejak rugi penurunan nilai terakhir diakui. Pembalikan tersebut dibatasi sehingga jumlah tercatat aset tidak melebihi jumlah terpulihkannya maupun jumlah tercatat, neto setelah penyusutan, seandainya tidak ada rugi penurunan nilai yang telah diakui untuk aset tersebut pada periode sebelumnya. Pembalikan rugi penurunan nilai diakui pada laba rugi.

**o. Impairment of Non-Financial Assets
(continued)**

In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

Impairment losses of continuing operations, if any, are recognized in the profit or loss in expense categories consistent with the functions of the impaired asset.

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Group estimates asset's or CGU's recoverable amount. A previously recognized impairment loss for an asset other than goodwill is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognized. The reversal is limited so that the carrying amount of the assets does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior period. Such reversal is recognized in the statement of profit or loss.

Setelah pembalikan tersebut, penyusutan aset tersebut disesuaikan di periode mendatang untuk mengalokasikan jumlah tercatat aset yang direvisi, dikurangi nilai sisanya, dengan dasar yang sistematis selama sisa umur manfaatnya.

Goodwill diuji untuk penurunan nilai setiap tahun dan ketika terdapat indikasi bahwa nilai tercatatnya mungkin mengalami penurunan nilai. Penurunan nilai bagi goodwill ditetapkan dengan menentukan jumlah tercatat tiap UPK (atau kelompok UPK) terkait dari goodwill tersebut. Jika jumlah terpulihkan UPK kurang dari jumlah tercatatnya, rugi penurunan nilai diakui. Rugi penurunan nilai terkait goodwill tidak dapat dibalik pada tahun berikutnya.

p. Imbalan Kerja

Perseroan dan entitas anak, mempunyai program dana pensiun iuran pasti untuk seluruh karyawan tetap yang memenuhi syarat.

Pembayaran program manfaat pensiun iuran pasti diakui sebagai beban pada saat pekerja telah memberikan jasa mereka, dimana mereka memperoleh hak atas iuran. Pembayaran kepada Dana Pensiun Lembaga Keuangan diperhitungkan sebagai pembayaran untuk program iuran pasti di mana kewajiban Perseroan dan anak perusahaan tertentu berdasarkan program tersebut setara dengan kewajiban yang timbul dalam program manfaat pensiun iuran pasti.

**o. Impairment of Non-Financial Assets
(continued)**

After such a reversal, the depreciation charge on the said asset is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

Goodwill is tested for impairment annually and when circumstances indicate that the carrying value may be impaired. Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or group of CGUs) to which the goodwill relates. Where the recoverable amount of the CGU is less than their carrying amount, an impairment loss is recognized. Impairment losses relating to goodwill cannot be reversed in future years.

p. Employee Benefits

The Company and its subsidiaries have defined contribution retirement plans covering all their qualified permanent employees.

Payments to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions. Payments made to Dana Pensiun Lembaga Keuangan are accounted for as payments to defined contribution plans where the obligations of Company's Plantations Division and certain subsidiaries under the plans are equivalent to those arising in a defined contribution retirement benefit plan.

Pendapatan dari Kontrak dengan Pelanggan

Grup bergerak dalam bisnis bidang telekomunikasi termasuk penyediaan sarana-prasarana jaringan telekomunikasi dan penyediaan jasa telekomunikasi.

Grup mengadopsi PSAK 115 pada tanggal 1 Januari 2020 menggunakan metode retrospektif yang dimodifikasi dengan mengakui efek kumulatif pada awal penerapan PSAK 115 sebagai penyesuaian terhadap saldo awal ekuitas pada 1 Januari 2020.

PSAK 115 "Pendapatan dari Kontrak dengan Pelanggan" menetapkan kerangka kerja yang komprehensif untuk menentukan bagaimana, kapan, dan berapa banyak pendapatan yang harus diakui. Standar ini menyediakan model lima langkah (*5-steps model*) tunggal berbasis prinsip untuk penentuan dan pengakuan pendapatan untuk diterapkan pada semua kontrak dengan pelanggan, sebagai berikut:

- i. Identifikasi kontrak dengan pelanggan.
- ii. Identifikasi kewajiban pelaksanaan dalam kontrak. Kewajiban pelaksanaan merupakan janji-janji dalam kontrak untuk menyerahkan barang atau jasa yang memiliki karakteristik berbeda ke pelanggan.
- iii. Menetapkan harga transaksi, setelah dikurangi diskon, retur, insentif penjualan dan pajak pertambahan nilai, yang berhak diperoleh suatu entitas sebagai kompensasi atas diserahkannya barang atau jasa yang dijanjikan di kontrak.

Revenue from Contracts with Customers

The Group is engaged in the telecommunications business including the provision of telecommunications network infrastructure and the provision of telecommunications services.

The Group adopted PSAK 115 dated January 1, 2020 using a retrospective method modified by recognizing the cumulative effect at the beginning of the application of PSAK 115 as an adjustment to the opening balance of equity on January 1, 2020.

PSAK 115 "Revenue from Contracts with Customers" provides a comprehensive framework for determining how, when and how much revenue should be recognized. This standard provides a principle-based, single 5-step model for revenue determination and recognition to be applied to all contracts with customers, as follows:

- i. Identify contracts with customers.
- ii. Identification of performance obligations in the contract. Performance obligations are promises in the contract to deliver goods or services that have different characteristics to customers.
- iii. Determine the transaction price, after deducting discounts, returns, sales incentives and value added tax, which an entity is entitled to obtain as compensation for the delivery of goods or services promised in the contract.

Standar ini juga memberikan panduan spesifik yang mensyaratkan jenis biaya tertentu untuk memperoleh dan/atau memenuhi kontrak yang akan dikapitalisasi dan diamortisasi secara sistematis yang konsisten dengan pengalihan kepada pelanggan barang atau jasa yang terkait dengan biaya yang dikapitalisasi.

In addition, in adopting PSAK 115, the Group has also chosen to apply practical guidance not to take into account the impact of the financing component when the period between payment for the goods or services promised and the transfer for the goods or services to the customer is less than one year.

Grup Sebagai Penyewa

Grup menerapkan pendekatan pengakuan dan pengukuran tunggal untuk semua sewa, kecuali untuk sewa jangka-pendek dan sewa yang aset dasarnya bernilai-rendah. Grup mengakui liabilitas sewa untuk melakukan pembayaran sewa dan aset hak-guna yang mewakili hak untuk menggunakan aset pendasar.

Aset hak-guna

Grup mengakui aset hak-guna pada tanggal permulaan sewa (yaitu tanggal aset pendasar tersedia untuk digunakan). Aset hak-guna diukur pada harga perolehan, dikurangi akumulasi penyusutan dan penurunan nilai, serta disesuaikan dengan pengukuran kembali liabilitas sewa. Biaya perolehan aset hak-guna mencakup jumlah liabilitas sewa yang diakui, biaya langsung awal yang terjadi, dan pembayaran sewa yang dilakukan pada atau sebelum tanggal permulaan dikurangi setiap insentif sewa yang diterima. Aset hak-guna disusutkan dengan metode garis lurus selama masa sewa.

Jika kepemilikan aset pendasar sewa beralih ke Grup pada akhir masa sewa atau biaya perolehan aset hak-guna merefleksikan Grup akan mengeksekusi opsi beli, maka penyusutan aset hak-guna dihitung menggunakan estimasi masa manfaat aset. Aset hak-guna juga dievaluasi untuk penurunan nilai (Note 2o).

s. Leases (continued)

The Group as Lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Right-of-use assets

The Group recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the lease term.

If ownership of the leased asset transfers to the Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also assessed for impairment (Note 2o).

s. Sewa (lanjutan)

Liabilitas sewa

Pada tanggal permulaan sewa, Grup mengakui liabilitas sewa yang diukur pada nilai kini pembayaran sewa yang harus dilakukan selama masa sewa.

Pembayaran sewa juga mencakup harga pelaksanaan dari opsi beli yang secara wajar pasti dilaksanakan oleh Grup dan pembayaran pinalti untuk mengakhiri sewa, jika masa sewa merefleksikan adanya opsi dapat mengakhiri sewa. Pembayaran sewa variabel yang tidak bergantung pada indeks atau tarif diakui sebagai beban pada periode terjadinya peristiwa atau kondisi yang memicu terjadinya pembayaran tersebut.

Dalam menghitung nilai kini pembayaran sewa, Grup menggunakan Suku Bunga Pinjaman Inkremental ("SBPI") pada tanggal permulaan sewa karena suku bunga implisit dalam sewa tidak dapat langsung ditentukan. Setelah tanggal permulaan, jumlah kewajiban sewa ditingkatkan untuk mencerminkan akresi bunga (atas efek diskonto) dan dikurangi untuk pembayaran sewa yang dilakukan. Selain itu, nilai tercatat liabilitas sewa diukur kembali jika terdapat modifikasi, perubahan masa sewa, perubahan pembayaran sewa, atau perubahan penilaian atas opsi untuk membeli aset pendasar.

Setelah tanggal permulaan, aset hak-guna diukur dengan model biaya. Aset hak-guna disusutkan berdasarkan metode garis lurus selama masa sewa yang lebih pendek dan estimasi masa manfaat dari aset, sebagai berikut:

s. Leases (continued)

Lease liabilities

At the commencement date of the lease, the Group recognizes lease liabilities measured at the present value of lease payments to be made over the lease term.

The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognized as expenses in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its Incremental Borrowing Rate ("IBR") at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments or a change in the assessment of an option to purchase the underlying asset.

After the commencement date, right-of-use assets are measured using the cost model. Right-of-use assets are depreciated on a straight-line basis over the shorter lease term and the estimated useful lives of the assets, as follows:

Sewa jangka pendek dan sewa dengan aset bernilai rendah

Short-term leases and leases of low-value assets

Grup menerapkan pengecualian pengakuan sewa jangka pendek untuk sewa yang jangka waktu sewanya pendek (yaitu, sewa yang memiliki jangka waktu sewa 12 bulan atau kurang dari tanggal permulaan dan tidak memiliki opsi beli). Grup juga menerapkan pengecualian pengakuan sewa dengan aset bernilai rendah untuk sewa yang aset dasarnya dianggap bernilai rendah. Pembayaran sewa untuk sewa jangka pendek dan sewa dari aset bernilai rendah diakui sebagai beban dengan metode garis lurus selama masa sewa.

The Group applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). The Group also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short-term leases and leases of low-value underlying assets are recognized as expense on a straight-line basis over the lease term.

Grup sebagai Lessor

The Group as Lessor

Sewa yang dalam pengaturannya Grup tidak mengalihkan secara substansial seluruh risiko dan manfaat yang terkait dengan kepemilikan suatu aset diklasifikasikan sebagai sewa operasi. Pendapatan sewa yang timbul dicatat dengan metode garis lurus selama masa sewa dan diakui sebagai bagian dari pendapatan usaha pada laba rugi karena sifatnya. Biaya langsung awal yang terjadi dalam negosiasi dan pengaturan sewa operasi ditambahkan ke jumlah tercatat dari aset sewaan dan diakui selama masa sewa atas dasar yang sama dengan pendapatan sewa. Sewa kontijensi diakui sebagai pendapatan pada periode dimana sewa kontijensi tersebut diperoleh.

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Lease income arising is accounted for on a straight-line basis over the lease terms and is included in other operating income in the profit or loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as lease income. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred Tax (continued)

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted as at the reporting date.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax items are recognized in correlation to the underlying transaction either in OCI or directly in equity.

Tax benefits acquired as part of a business combination, but not satisfying the criteria for separate recognition at that date, are recognized subsequently if new information about facts and circumstances change. The adjustment is either treated as a reduction in goodwill (as long as it does not exceed goodwill) if it was incurred during the measurement period or recognized in profit or loss.

- Receivables and payables that are stated with the amount of VAT included

The net amount of VAT recoverable from, or payable to, the taxation authorities is included as part of receivables or payables in the consolidated statement of financial position.

Final Tax

Indonesian tax regulations impose final tax on several types of transactions based on the gross value of the transaction. Therefore, final tax which is charged based on such transaction remains subject to tax even though the tax payer incurred a loss on the transaction.

Income from telecommunication tower rental services and certain construction services is subject to final tax of 10% and 2% - 3% of gross income, respectively.

The final tax is not included in the scope of PSAK 212. Accordingly, the Group decided to present the final tax expense relating to telecommunication tower rental services and construction services as final tax expense.

x. Pembayaran Berbasis Saham

Karyawan (termasuk eksekutif senior) Grup menerima remunerasi dalam bentuk pembayaran berbasis saham, di mana karyawan memberikan jasa sebagai imbalan atas instrumen ekuitas (transaksi yang diselesaikan dengan ekuitas). Karyawan yang bekerja dalam kelompok pengembangan usaha diberikan hak apresiasi saham, yang diselesaikan secara tunai (cash-settled transaction).

w. Goodwill

Goodwill is the difference between the acquisition cost and the Company's share of the net asset fair value of the acquired subsidiaries at the date of acquisition. *Goodwill* is tested for impairment each year and recorded at the acquisition price minus accumulated impairment losses on *goodwill* irreversibly. The profit and loss of the disposal of an entity includes the carrying amount of *goodwill* associated with the entity sold.

Goodwill is allocated to cash-generating units in order to test impairments. Allocations are made for cash-producing units or cash-generating units that are expected to benefit from the combination of businesses in which the *goodwill* arises.

Transaksi kompensasi berbasis saham yang diselesaikan dengan instrumen ekuitas

Biaya transaksi yang diselesaikan dengan ekuitas ditentukan oleh nilai wajar pada tanggal pemberian diberikan dengan menggunakan model penilaian yang sesuai, rincian lebih lanjut diberikan dalam Catatan 26.

Biaya tersebut diakui dalam beban imbalan kerja (Catatan 25), bersama-sama dengan peningkatan ekuitas (cadangan modal lain-lain), selama periode jasa dan, jika berlaku, kondisi kinerja terpenuhi (periode vesting). Beban kumulatif yang diakui untuk transaksi yang diselesaikan dengan ekuitas pada setiap tanggal pelaporan hingga tanggal vesting mencerminkan sejauh mana periode vesting telah berakhir dan estimasi terbaik Grup atas jumlah instrumen ekuitas yang pada akhirnya akan menjadi vest. Beban atau kredit dalam laporan laba rugi suatu periode merupakan pergerakan beban kumulatif yang diakui pada awal dan akhir periode tersebut.

Kondisi layanan dan kinerja non-pasar tidak diperhitungkan saat menentukan nilai wajar tanggal pemberian penghargaan, tetapi kemungkinan kondisi terpenuhi dinilai sebagai bagian dari estimasi terbaik Grup atas jumlah instrumen ekuitas yang pada akhirnya akan menjadi hak. Kondisi kinerja pasar tercermin dalam nilai wajar tanggal pemberian. Setiap kondisi lain yang melekat pada penghargaan, tetapi tanpa persyaratan layanan terkait, dianggap sebagai kondisi non-vesting. Kondisi non-vesting tercermin dalam nilai wajar penghargaan dan mengarah pada pengeluaran langsung penghargaan kecuali ada juga layanan dan/atau kondisi kinerja.

x. Shared-based Payment (continued)

Equity-settled share-based payment transactions

The cost of equity-settled transactions is determined by the fair value at the date when the grant is made using an appropriate valuation model, further details of which are given in Note 26.

That cost is recognized in employee benefits expense (Note 25), together with a corresponding increase in equity (other capital reserves), over the period in which the service and, where applicable, the performance conditions are fulfilled (the vesting period). The cumulative expense recognized for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the number of equity instruments that will ultimately vest. The expense or credit in the statement of profit or loss for a period represents the movement in cumulative expense recognized as at the beginning and end of that period.

Service and non-market performance conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the conditions being met is assessed as part of the Group's best estimate of the number of equity instruments that will ultimately vest. Market performance conditions are reflected within the grant date fair value. Any other conditions attached to an award, but without an associated service requirement, are considered to be non-vesting conditions. Non-vesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an award unless there are also service and/or performance conditions

Beban tambahan, diukur pada tanggal modifikasi, diakui untuk setiap modifikasi yang meningkatkan nilai wajar total transaksi pembayaran berbasis saham, atau bermanfaat bagi karyawan. Jika suatu putusan dibatalkan oleh entitas atau oleh pihak lawan, setiap elemen yang tersisa dari nilai wajar penghargaan dibebankan segera melalui laba rugi.

When the terms of an equity-settled award are modified, the minimum expense recognized is the grant date fair value of the unmodified award, provided the original vesting terms of the award are met. An additional expense, measured as at the date of modification, is recognized for any modification that increases the total fair value of the share-based payment transaction, or is otherwise beneficial to the employee. 3 PERTIMBANGAN, ESTIMASI DAN ASUMSI YANG SIGNIFIKAN

Penyusunan laporan keuangan konsolidasian sesuai dengan Standar Akuntansi Keuangan di Indonesia mewajibkan manajemen untuk membuat estimasi dan asumsi yang mempengaruhi jumlah-jumlah yang dilaporkan dalam laporan keuangan konsolidasian. Sehubungan dengan adanya ketidakpastian yang melekat dalam membuat estimasi, hasil sebenarnya yang dilaporkan di masa mendatang dapat berbeda dengan jumlah estimasi yang dibuat.

Estimasi dan pertimbangan terus dievaluasi berdasarkan pengalaman historis dan faktor-faktor lain, termasuk ekspektasi peristiwa masa depan yang diyakini wajar berdasarkan kondisi yang ada. Pertimbangan, estimasi, dan asumsi berikut ini dibuat oleh manajemen dalam rangka penerapan kebijakan akuntansi Grup yang memiliki pengaruh paling signifikan atas jumlah yang diakui dalam laporan keuangan konsolidasian.

Pertimbangan

Penentuan Mata Uang Fungsional

Mata uang fungsional Grup merupakan mata uang dalam lingkungan ekonomi primer dimana Grup beroperasi. Mata uang tersebut adalah mata uang yang paling mempengaruhi pendapatan dan beban pokok pendapatan. Berdasarkan penilaian manajemen Grup, mata uang fungsional Grup adalah Rupiah.

Menentukan Jangka Waktu Kontrak dengan
Opsi Perpanjangan dan Pemutusan Kontrak –
Grup sebagai Lessee

Grup menentukan jangka waktu sewa sebagai jangka waktu sewa yang tidak dapat dibatalkan, bersama dengan periode yang dicakup oleh opsi untuk memperpanjang masa sewa jika dipastikan akan dilaksanakan, atau periode yang dicakup oleh opsi untuk mengakhiri sewa, jika cukup masuk akal untuk tidak dilakukan.

Grup memiliki beberapa kontrak sewa yang mencakup opsi perpanjangan dan pemutusan kontrak. Grup menerapkan penilaian dalam mengevaluasi apakah dapat dipastikan Grup akan menggunakan opsi untuk memperpanjang atau mengakhiri sewa. Artinya, Grup mempertimbangkan semua faktor yang relevan yang menciptakan insentif ekonomi untuk melakukan perpanjangan atau pemutusan kontrak. Setelah tanggal mulai sewa, Grup menilai kembali masa sewa jika terdapat peristiwa atau perubahan signifikan dalam keadaan yang berada dalam kendali Grup dan mempengaruhi kemampuannya untuk menggunakan atau tidak menggunakan opsi untuk memperpanjang atau mengakhiri kontrak sewa.

Liabilitas Imbalan Karyawan

Nilai kini liabilitas imbalan karyawan tergantung pada beberapa faktor yang ditentukan dengan beberapa asumsi. Asumsi yang digunakan mencakup tingkat diskonto, tingkat kenaikan gaji tahunan, tingkat kecacatan, umur pensiun, dan tingkat kematian. Hasil aktual yang berbeda dengan asumsi yang ditetapkan Grup langsung diakui dalam laporan laba rugi konsolidasian pada saat terjadinya. Meskipun Grup berkeyakinan bahwa asumsi tersebut adalah wajar dan sesuai, perbedaan signifikan pada hasil aktual atau perubahan signifikan dalam asumsi yang ditetapkan Grup dapat mempengaruhi secara material provisi dan beban neto atas beban imbalan kerja karyawan. Determine The Term of The Contract with
The Option of Contract Extension and
Termination - The Group as Lessee

The Group determines the lease term as the term of the lease that cannot be canceled, together with the period covered by the option to extend the lease if it is determined to be implemented, or the period covered by the option to terminate the lease, if it is reasonable not to do so.

The Group has several lease contracts that include options for contract extension and termination. The Group applies its judgment in evaluating whether it is certain that the Group will exercise the option to extend or terminate the lease. This means that the Group considers all relevant factors that create economic incentives to extend or terminate contracts. After the start date of the lease, the Group reassesses the lease term if there are significant events or changes in circumstances that are within the control of the Group and affect its ability to exercise or not exercise the option to extend or terminate the lease contract.

Employee Benefit Obligations

The present value of the employee benefit obligations depends on several factors that are determined using several assumptions. The assumptions used include the discount rate, annual salary increase rate, disability rate, retirement age and mortality rate. Actual results that differ from the Group's assumptions are recognized immediately in the consolidated statement of income as incurred. Although the Group believes that these assumptions are reasonable and appropriate, a significant difference in the actual results or a significant change in the Group's assumptions could materially affect the provision and net expense of employee benefits expenses. Further details are disclosed in Notes 2p and 25.

Penyusutan Aset Tetap dan Amortisasi Aset
Takberwujud

Biaya perolehan aset tetap dan aset takberwujud masing-masing disusutkan dan diamortisasikan dengan menggunakan metode garis lurus berdasarkan taksiran masa manfaat ekonomisnya. Manajemen mengestimasi masa manfaat ekonomis aset tetap antara 3 sampai dengan 40 tahun dan masa manfaat ekonomis aset takberwujud antara 3 hingga 20 tahun.

Perubahan tingkat pemakaian dan perkembangan teknologi dapat mempengaruhi masa manfaat ekonomis dan nilai sisa aset-aset tersebut, dan karenanya biaya penyusutan dan biaya amortisasi masa depan mungkin direvisi. Penjelasan lebih rinci diungkapkan dalam Catatan 21 dan 11.

Perpajakan

Ketidakpastian atas interpretasi dari peraturan pajak yang kompleks, perubahan peraturan pajak dan jumlah dan timbulnya penghasilan kena pajak di masa depan, dapat menyebabkan penyesuaian di masa depan atas penghasilan dan beban pajak yang telah dicatat.

Pertimbangan signifikan dilakukan dalam menentukan penyisihan atas pajak penghasilan badan maupun pajak lain-lain atas transaksi tertentu. Ketidakpastian timbul terkait dengan interpretasi dari peraturan perpajakan yang kompleks dan jumlah dan waktu dari penghasilan kena pajak di masa depan.

Depreciation of Fixed Assets and

The costs of fixed assets and intangible assets are depreciated and amortized using the straight-line method based on their estimated useful lives. Management estimates the useful lives of these fixed assets to be 3 to 40 years and the useful lives of the intangible assets from 3 to 20 years.

Changes in the level of usage and technological developments can affect the economic useful lives and residual values of these assets, and accordingly future depreciation charges and amortization costs may be revised. Further details are disclosed in Notes 21 and 11.

Taxes

Uncertainties exist with respect to the interpretation of complex tax regulations, changes in tax laws, and the amount and timing of future taxable income, could necessitate future adjustments to tax income and expense already recorded.

Significant judgment is also involved in determining the provision for corporate income tax although other taxes on certain transaction. There are certain transactions and computation for which the ultimate tax determination is uncertain during the ordinary course of business.

Grup menerapkan PSAK 116 yang mensyaratkan pengakuan liabilitas sewa sehubungan dengan sewa yang sebelumnya diklasifikasikan sebagai 'Sewa Operasi'.

In determining the amount that should be recognized in relation to an uncertain tax liability, the Group applies the same judgment that would be used in determining the amount of the allowance that should be recognized in accordance with PSAK 237 and ISAK 34, Provisions, Contingent Liabilities, and Contingent Assets. The Group makes a review of all tax positions related to income tax to determine if the tax payable for unrecognized tax benefits should be recognized. The Group recognizes liabilities for corporate income tax based on estimates of whether there will be additional corporate income tax. Further details are disclosed in Notes 2t and 38.

Leases

The Group has adopted PSAK 116, which sets the requirement for recognition of lease liabilities in relation to leases which had previously been classified as 'operating leases'.

At the inception of a contract, the Group assesses whether the contract is, or contains, a lease. A contract is or contains a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Estimasi dan Asumsi

Asumsi utama masa depan dan sumber utama estimasi ketidakpastian lain pada tanggal pelaporan yang memiliki risiko signifikan bagi penyesuaian yang material terhadap nilai tercatat aset dan liabilitas untuk tahun berikutnya diungkapkan di bawah ini. Grup mendasarkan asumsi dan estimasi pada parameter yang tersedia pada saat laporan keuangan konsolidasian disusun. Asumsi dan situasi mengenai perkembangan masa depan mungkin berubah akibat perubahan pasar atau situasi di luar kendali Grup. Perubahan tersebut dicerminkan dalam asumsi terkait pada saat terjadinya.

Kerugian Kredit Ekpektasian untuk Aset Keuangan

Untuk piutang usaha dan aset kontrak, Grup menerapkan panduan praktis dalam menghitung kerugian kredit ekspektasian. Oleh karena itu, Grup tidak mengidentifikasi perubahan dalam risiko kredit, melainkan mengukur penyisihan kerugian berdasarkan kerugian kredit ekpektasian sepanjang kepemilikan aset pada tanggal pelaporan. Grup telah membentuk matriks provisi yang didasarkan pada data historis kerugian kredit, disesuaikan dengan faktor-faktor perkiraan masa depan (*forward-looking*) khusus terkait pelanggan dan lingkungan ekonomi.

Untuk instrumen utang yang diukur pada nilai wajar melalui penghasilan komprehensif lain, Grup menerapkan metode yang disederhanakan. Pada setiap tanggal pelaporan, Grup mengevaluasi apakah instrumen utang dianggap memiliki risiko kredit rendah dengan menggunakan semua informasi yang tersedia tanpa biaya atau upaya yang berlebihan. Dalam melakukan evaluasi itu, Grup menilai kembali peringkat kredit eksternal dari instrumen utang. Selain itu, Grup menganggap bahwa telah terjadi peningkatan risiko kredit yang signifikan ketika pembayaran kontrak lebih dari 30 hari tunggakan.

Estimates and Assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing material adjustments to the carrying amounts of assets and liabilities within the next financial year are disclosed below. The Group based its assumptions and estimates on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments may change due to market changes or circumstances arising that are beyond the control of the Group. Such changes are reflected in the assumptions when they occur.

Expected Credit Loss for Financial Assets

For trade receivables and contract assets, the Group applies practical guidelines in calculating expected credit losses. Accordingly, the Group does not identify changes in credit risk, but rather measures the allowance for losses based on expected credit losses as long as the assets hold at the reporting date. The Group has established a provisioning matrix based on historical data on credit losses, adjusted for specific forward-looking factors related to customers and the economic environment.

For debt instruments measured at fair value through other comprehensive income, the Group applies the simplified method. At each reporting date, the Group evaluates whether a debt instrument is considered to have low credit risk using all available information without undue cost or effort. In conducting this evaluation, the Group reassesses the external credit rating of the debt instrument. In addition, the Group considers that there has been a significant increase in credit risk when the contract payment is more than 30 days in arrears.

Estimasi Biaya Pembongkaran Menara

Grup melakukan penelaahan atas estimasi biaya pembongkaran menara pada akhir periode laporan. Dalam penentuan jumlah estimasi biaya tersebut diperlukan estimasi dan asumsi yang signifikan karena terdapat banyak faktor yang mempengaruhi jumlah liabilitas pada akhirnya. Faktor-faktor tersebut mencakup estimasi untuk waktu dan jumlah biaya untuk aktivitas pembongkaran, perubahan teknologi, perubahan peraturan, peningkatan biaya karena tingkat inflasi dan perubahan tingkat bunga diskonto. Ketidakpastian tersebut dapat mengakibatkan jumlah pengeluaran aktual di masa mendatang dapat berbeda dengan jumlah yang dicadangkan saat ini. The Group evaluates whether there is objective evidence that trade receivables are impaired at the end of each reporting period. These provisions are adjusted periodically to reflect actual and estimated results. Details of the nature and carrying amount of provision for impairment of receivables are disclosed in Note 7.

Estimated Cost of Dismantling of Towers

The Group assess their estimated cost of dismantling of towers at end of reporting period. Significant estimates and assumptions are made in determining the estimation cost as there are numerous factors that will affect the ultimate liability. These factors include estimates of the extent and costs of dismantling activities, technological changes, regulatory changes, cost increases due to inflation rates and changes in discount rates. Those uncertainties may result in future actual expenditure differing from the amounts currently provided. The estimated cost at end of reporting period represents management's best estimate of the present value of the future dismantling costs required. Further details are disclosed in Note 24.

Uji Penurunan Nilai Aset Tidak Lancar dan Goodwill

Penerapan metode akuisisi dalam suatu kombinasi bisnis mensyaratkan penggunaan estimasi akuntansi secara ekstensif dalam mengalokasikan harga beli kepada nilai pasar wajar aset dan liabilitas yang diakuisisi, termasuk aset takberwujud. Akuisisi bisnis tertentu oleh Grup menimbulkan *goodwill*, yang tidak diamortisasi namun diuji bagi penurunan nilai setiap tahunnya dan setiap terdapat indikasi penurunan nilai.

Perhitungan arus kas masa depan dalam menentukan nilai wajar aset tetap dan aset tidak lancar lainnya dari entitas yang diakuisisi pada tanggal akuisisi melibatkan estimasi yang signifikan. Walaupun manajemen berkeyakinan bahwa asumsi yang digunakan adalah tepat dan memiliki dasar yang kuat, perubahan signifikan pada asumsi tersebut dapat mempengaruhi secara material evaluasi atas nilai terpulihkan dan dapat menimbulkan penurunan nilai sesuai PSAK 236: Penurunan Nilai Aset.

Pengukuran nilai wajar instrumen keuangan

Ketika nilai wajar atas aset keuangan dan liabilitas keuangan yang tercatat pada laporan posisi keuangan tidak dapat diukur pada harga kuotasian di pasar aktif, nilai wajar diukur menggunakan teknik penilaian termasuk model arus kas diskonto. Input atas model ini diambil dari pasar yang dapat diobservasi apabila memungkinkan, namun apabila tidak tersedia, sejumlah pertimbangan diperlukan dalam menetapkan nilai wajar. Pertimbangan mencakup input seperti risiko likuiditas, risiko kredit dan volatilitas. Perubahan asumsi yang berkaitan dengan faktor-faktor tersebut dapat mempengaruhi nilai wajar instrumen keuangan yang dilaporkan.

Test for Impairment of Non-Current Assets and Goodwill

Applying the acquisition method to a business combination requires the use of accounting estimates extensively in allocating the purchase price to the fair market values of the acquired assets and liabilities, including intangible assets. Certain business acquisitions by the Group have resulted in goodwill, which is not amortized but is tested for impairment annually and any indication of impairment exists.

Calculation of future cash flows in determining the fair value of the acquired entity's fixed assets and other non-current assets at the acquisition date involves a significant estimate. Although management believes that the assumptions used are correct and have strong basis, significant changes in these assumptions could materially affect the evaluation of recoverable amounts and could lead to impairment in accordance with PSAK 236: Impairment of Asset.

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the statement of financial position cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the discounted cash flow ("DCF") model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions relating to these factors could affect the reported fair value of financial instruments.

Akuisisi

Grup mengevaluasi setiap transaksi akuisisi untuk menentukan akan diperlakukan sebagai akuisisi aset atau kombinasi bisnis. Untuk transaksi yang diperlakukan sebagai akuisisi aset, harga pembelian dialokasikan untuk aset yang diperoleh, tanpa pengakuan goodwill.

Untuk akuisisi yang memenuhi definisi kombinasi bisnis, Grup menerapkan metode akuisisi akuntansi atas aset yang diperoleh dan liabilitas yang diambil alih dicatat pada nilai wajar pada tanggal akuisisi, dan hasil operasi disertakan dengan hasil Grup dari tanggal akuisisi masing-masing.

Setiap kelebihan dari harga pembelian dibayar atas jumlah yang diakui untuk aset yang diperoleh dan liabilitas diambil alih dicatat sebagai *goodwill*. Grup terus mengevaluasi akuisisi yang diperhitungkan sebagai kombinasi bisnis untuk jangka waktu tidak melebihi satu tahun setelah tanggal akuisisi yang berlaku dari setiap transaksi untuk menentukan apakah penyesuaian tambahan diperlukan untuk alokasi harga pembelian yang dibayarkan untuk aset yang diperoleh dan liabilitas yang diambil alih.

Nilai wajar dari aset yang diperoleh dan liabilitas yang diambil alih biasanya ditentukan dengan menggunakan salah satu perkiraan biaya penggantian atau metode penilaian arus kas diskonto. Ketika menentukan nilai wajar dari aset berwujud yang diperoleh, Grup memperkirakan biaya untuk mengganti aset dengan aset baru dengan mempertimbangkan faktor seperti umur, kondisi dan masa manfaat ekonomi dari aset. Ketika menentukan nilai wajar dari aset tidak berwujud yang diperoleh, Grup memperkirakan tingkat diskonto yang berlaku dan waktu dan jumlah arus kas masa depan, termasuk tingkat dan persyaratan atas perpanjangan dan pengurangan.

Estimates and Assumptions (continued)

Acquisition

The Group evaluates each acquisition transaction to determine whether it will be treated as an asset acquisition or business combination. For transactions treated as asset acquisitions, the purchase price is allocated to the assets acquired, without the recognition of goodwill.

For acquisitions that meet the definition of a business combination, the Group applies the acquisition method of accounting for assets acquired and liabilities assumed are carried at fair value at the acquisition date, and the results of operations are included with the Group's results from the respective acquisition date.

Any excess of the purchase price paid over the amount recognized for assets acquired and liabilities assumed is recorded as goodwill. The Group continues to evaluate acquisitions that are accounted for as business combinations for periods not exceeding one year after the current acquisition date of each transaction to determine whether additional adjustments are required for the allocation of the purchase price paid for assets acquired and liabilities assumed.

The fair value of assets acquired and liabilities assumed is usually determined using either replacement cost estimates or discounted cash flow valuation methods. When determining the fair value of acquired tangible assets, the Group estimates the cost of replacing the assets with new assets taking into account factors such as the life, condition and economic useful lives of the assets. When determining the fair value of acquired intangible assets, the Group estimates the applicable discount rate and the timing and amount of future cash flows, including the rates and requirements for extensions and deductions.

Depreciation of Right-of-Use Assets

The costs of right-of-use assets are depreciated on a straight-line basis over their estimates the useful lives of these leased assets to be within 1 (one) to 33 (thirty three) years. Sewa - Memperkirakan Suku Bunga
Pinjaman Tambahan

Grup tidak dapat langsung menentukan tingkat bunga implisit dalam sewa, oleh karena itu, Grup menggunakan suku bunga pinjaman tambahan (IBR) untuk mengukur liabilitas sewa. IBR adalah tingkat bunga yang harus dibayar oleh Grup untuk meminjam dengan syarat yang sama, dan dengan jaminan serupa, dana yang diperlukan untuk memperoleh aset dengan nilai yang sama dengan aset hak-guna dalam lingkup ekonomi yang serupa. Oleh karena itu, IBR mencerminkan apa yang 'harus dibayar' oleh Perseroan, yang memerlukan estimasi ketika tidak tersedianya tingkat suku bunga yang dapat diobservasi atau ketika perlu disesuaikan untuk mencerminkan syarat dan ketentuan dari sewa. Grup mengestimasi IBR menggunakan input yang dapat diamati (seperti tingkat suku bunga pasar) jika tersedia dan diperlukan untuk membuat estimasi spesifik entitas tertentu.

Program Kompensasi Manajemen Berbasis Saham (MESOP)

Perseroan mengukur beban dari transaksi yang diselesaikan dengan instrumen ekuitas (MESOP) kepada manajemen dan karyawan dengan mengacu pada nilai wajar dari instrumen ekuitas pada tanggal instrumen tersebut diberikan (grant). Dalam mengestimasi nilai wajar dari transaksi pembayaran berbasis saham memerlukan penentuan model penilaian yang paling tepat, yang tergantung pada persyaratan dan ketentuan dari sifat MESOP. Estimasi ini juga mengharuskan perseroan melakukan penentuan input yang paling tepat ke dalam model penilaian yang mencakup antara lain, ekspektasi umur dari opsi saham, tingkat volatilitas saham dan suku bunga bebas risiko. Leases - Estimating the Incremental
Borrowing Rate

The Group cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate (IBR) to measure lease liabilities. The IBR is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Group 'would have to pay', which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the lease. The Group estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates.

Management Stock Option Plan (MESOP)

The Company measures the cost of equity settled transactions (MESOP) with management and employees by reference to the fair value of the equity instruments at the date at which they are granted. The Group places the majority of its cash and cash equivalents in state-owned banks because state-owned banks have the largest branch network in Indonesia and are considered trusted banks. Therefore, this placement aims to minimize financial losses arising from potential defaults in payments from banks and financial institutions.

As of December 31, 2024 and 2023, the Group's maximum exposure of the credit risk approximates net carrying amounts of trade receivables and other current assets as disclosed in Note 7 and 9.

Risiko Likuiditas

Risiko likuiditas didefinisikan sebagai risiko saat posisi arus kas Grup menunjukkan bahwa pendapatan jangka pendek tidak cukup menutupi pengeluaran jangka pendek. Dalam mengelola risiko likuiditas, Grup memantau dan menjaga tingkat kas dan setara kas yang dianggap memadai untuk membiayai operasional Grup dan untuk mengatasi dampak dari fluktuasi arus kas. Grup juga secara rutin mengevaluasi proyeksi arus kas dan arus kas aktual.

Grup melakukan penempatan dananya terutama pada bank milik negara. Grup menempatkan sebagian besar kas dan setara kasnya di bank-bank tersebut karena mereka memiliki jaringan cabang yang luas di Indonesia dan secara keuangan dianggap aman karena dimiliki oleh negara.

Tabel berikut ini menunjukkan profil jangka waktu pembayaran liabilitas Grup berdasarkan jatuh tempo pembayaran dalam kontrak.

Liquidity Risks

Liquidity risk is defined as the risk when the Group's cash flow position indicates that short-term revenues are not sufficient to cover short-term expenditures. In managing liquidity risk, the Group monitors and maintains a level of cash and cash equivalents deemed adequate to finance the Group's operations and to mitigate the impact of fluctuations in cash flow. The Group also regularly evaluates cash flow projections and actual cash flows.

The Group places its funds mainly in state-owned banks. The Group places most of its cash and cash equivalents in these banks because they have an extensive branch network in Indonesia and are considered financially secure because they are owned by the state.

The following table shows the profile of the Group's liabilities payment terms based on the payment maturities in the contracts.
